HOTELS ATTEST NATION'S GAINS UNDER DRY LAW

Elimination of Bars Led to Improved Services Along Other Lines

IMMENSE HOSTELRIES ENJOYING PROSPERITY

Part of Patronage Credited to Public's Increased Savings Under Prohibition Era

To clarify one of the paramount issues of the presidential campaign, THE CHRISTIAN SCIENCE MONITOR offers a series of 18 articles, showing the fallacy of some criticisms of prohibition, presenting some of its latest moral, social and economic aspects, recording instances of its proven worth and giving reasons why it should be strengthened rather than modified.

With prohibition has come an era of expansion in the hotel business schich has placed it ninth among the great industries in the United States. How much of this unprecedented growth is directly due to prohibition is discussed by three hotel men in this, the twelfth, arti-

manager of the Riverbank Court
Hotel, Cambridge, Mass., "a wave of

BY THE ASSOCIATED PRESS

COURSE in "mopology" will be offered at the university of Cincinnati if the recommendations of Dr. Harry S. Ganders, professor of education, are followed. He proposes a training class for school janitors and engineers which, if begun, would be the first in this section of the country.

Dr. Ganders maintains that no one except the principal has more influence over the conditions under which school children work than the janitor, which he gives as a reason for the desirability of estab-lishing such a training course.

Thanksgiving Proclamation

By the President of the United States

THE season again approaches when it has been the custom for generations to set apart a day of thanksgiving for the bless-Lings which the Giver of all good and perfect gifts has bestowed upon us during the year. It is most becoming that we should do this, for the goodness and mercy of God which have followed us through the year deserve our grateful recognition and

Through His divine favor, peace and tranquillity have reigned throughout the land. He has protected our country as a whole against pestilence and disaster and has directed us in the way of national prosperity. Our fields have been abundantly productive; our industries have flourished; our commerce has increased; wages have been lucrative and contentment has followed the undisturbed pursuit of honest toil.

As we have prospered in material things, so have we also grown and expanded in things spiritual. Through divine inspiration we have enlarged our charities and our missions; we have been imbued with high ideals which have operated for the benefit of the world and the promotion of the brotherhood of man through peace and good will.

Wherefore, I, Calvin Coolidge, President of the United States, do hereby set apart Thursday, the 29th day of November next, as a day of general thanksgiving and prayer, and I recommend that on that day the people shall cease from their daily work and in their homes and in their accustomed places of worship devoutly give thanks to the Almighty for the many and great blessings they have received, and seek His guidance that they may deserve a continuance of His favor.

In witness whereof I have hereunto set my hand and caused to le affixed the Great Seal of the United States. Done at the City of Washington, this 23d day of October, in the year of our Lord one thousand nine hundred and twenty-eight, and of the independence of the United States, the one hundred and

IRON AND STEEL PLACED IN ROLE OF BENEFACTORS

Scope of Industry Defined at Columbia Conference-Newspapers Defended

NEW YORK (A)-Products of the iron and steel industry are so vital to the country's happiness, welfare, and safety that the Nation may well protect and encourage it in all fair ways, Myron O. Taylor, chairman of the United States Steel Corporation's finance committee, told the Conference of Major Industries at Columbia University.

many industries are dependent upon industry for the smooth running of the general commerce of the country, but that few realize with what perfection the system of production must be synchronized and plant capacities provided to meet peaks of demand without embarrassment to the Nation. Mr. Taylor declared the industry "is (serving the public for an exceedingly modest reward."

Average Return Estimated

It was estimated, he said, that the industry has a capital in excess of \$4,750,000,000, or, considering property values at reproduction cost, of bined results of 13 leading companies

poration between 1902 and 1906 at 6.67 per cent, and between 1924 and common stock.

Mr. Taylor said steel was becoming more and more an essential material, supplanting many other materials in daily use, and with bountiful natural resources assuring a supply in re quired quantities.

announcement that he would appoint Hoover was more fitted by training and background to deal with agricultural problems than the New York

Referring to the tariff, the former Secretary of State declared that Governor Smith's proposal for specific tariff revisions based on the recommendations of an impartial tariff commission was "as impracticable

as some of his other suggestions." Text of Hughes's Speech The complete text of Mr. Hughes's address follows:

Politics is the great American-staple. With our forty-eight states and the Federal Government, we have the largest output of politics per capita of all the countries in the world. We are now at the height of productivity. The American people have an extensive political experi-ence and have developed what may be called political common sense in be called political common sense in dealing with issues that affect their conomic interests. This common onse will determine the election. We are electing a succesor to an

able, conscientious and highly es-teemed President. There is always partisan carping at an administra-tion, and also, and inevitably, honest disagreement on the part of many with policies and action. But I believe that rarely, if ever, in our-history has there been such general contemporaneous approval of an ad-ministration as of that of President Coolidge. Whatever disagreement there has been in particulars, the great majority of our people have trusted him as both capable and wise. The people have had confi-dence in Calvin Coolidge.

The success of his administration has been due to sound policies which, despite the existence of difficult and important problems yet to be solved, have contributed to a de-gree of prosperity which has excited the wonder and envy of the world We wish that prosperity had been greater, that it had been wide enough to embrace all. But we are grateful that it has been no less. We desire to make sure that it will not be less. We wish to hold what we have and increase it. Identified. with this administration, and one of the chief factors in its success, is the Republican candidate for President. If anyone can buttress our prosperity and extend it, that one is Herbert Hoover.

Let me first direct attention to what it means to elect a President. The air is full of demands, complaints, criticism and assertion. But in all that is said, it is very doubtful whether we even conceive of the contingencies with which the next President will have to deal. In our campaigns we talk of much that doesn't happen and know very little of what will happen. Experience

Hughes in Speech Calls Hoover Better Fitted Than Smith for Presidency

(Continued from Page 1)

teaches us how unexpected are the emergencies, the crises which con-front the President and in which we must depend upon his qualifications of knowledge, training and ability rather than upon what has been dis-cussed before his election.

Issues Are Important Issues are important. But in the final determination of most of them we must have the concurrent action of Congress. Meanwhile, the President, as the Executive head of the Nation, has a host of exigencies with which he must deal in his own

We have a choice between two We have a choice between two men. It is not merely a question as between two parties. It is not merely a question as to what qualification one or the other of these two men has, considered alone, or as compared with someone else. The primary question is: Which one for this highest office is the better of these two men? The question is between Smith and Hoover, and I decidedly prefer Hoover.

we should deal with this ques-tion in the American spirit. I have no patience with bigotry. I confess that I am intolerant of intolerance. I denounce every effort to bring any question of religion into this campaign. We have enough trouble campaign. We have enough trouble in this country without introducing into our political discussions differences of religious faith. In this Republic every one has the right to worship God according to his own conscience, and we subject no candidate for office to any religious test. This American spirit is the hope of our country, the essential safeguard of religion itself as well as of the State.

Be Fair to Both Nominees

Let us also have the sportsman-like spirit and be fair to both can-didates. I do not regard it as any disparagement of the personal qualities of Smith to prefer Hoover. Both men have much to their credit. Both represent the American tradi-tion of rising from poor and humble circumstances. To great place. The Both represent the American tradition of rising from poor and humble circumstances to great place. The one is the child of the city, the other of the country. Each has had his distinctive environment and sphere of effort, but each has been the builder of his own success. Each should have the credit of his achievements. But, in my mind, considering the office of President of the United States, there is a wide difference and a clear room for preference. I say this with respect to the qualifications of knowledge, training, executive ability, talent for co-operation, resourcefulness, humane and liberal spirit and capacity for leadership, every one of which is important.

Born in a little village in Iowa, left an orphan at the age of nine, taken soon after to Oregon, working his way through college in California, Herbert Hoover came to manhood with the advantages of a sound and liberal education, hard won through his own efforts. Utilizing his college vacations in the service of the Geological Survey in

his college vacations in vice of the Geological Survey service of the Geological Survey in Arkansas and the Sierras, later serving as a laborer in a mine, he early attained an unusually broad and practical knowledge, and he started with this equipment in his

Hoover's Record American methods in many coun American methods in many coun-tries. While engaged in these enter-prises he retained his residence in the United States. In a few years he became head of his own business with offices in San Francisco, New with offices in San Francisco, New York and several foreign lands. He became distinguished not only as an engineer, but as a most competent administrator. He has the fascinating combination of wide technical knowledge, the sagacity of a man of affairs and the discipline of one trained in undertakings where success demands both accuracy and imagination, insight and foresight. The discipline of the engineer is in facing actualities. He deals with the inexorableness of facts and must find his way out by considering his problems on their merits. The art of the

politician in capitalizing popular il-lusions does not aid him. In 1914, at the instance of the city of San Francisco, Mr. Hoover went to Europe on behalf of the Panama Pacific Exposition; and beranama racine Exposition, and we ing abroad when the Great War broke out, his executive ability was at once commandeered. He became the head of the greatest relief work the head of the greatest relief work ever undertaken. Since then he has been engaged in most important public activities. His administrative talent has made him famous throughout the world and has added prestige to the American name.

Hoover Knows the World As I said years ago, when it was my privilege to present to him the Civic Forum Medal for distinguished service, "The Americanism of Hoover is shown in every deed, in every utterance." But he knows the world as few Americans know it. No one in Europe questions his devotion to the interests of the United States. We are told by a distinguished foreign correspondent who has given many years to a close study of European affairs and opinions, that European affairs and opinions, that Europe "believes that with Hoover in the White House the methods and systems which have had vogue in the Department of Commerce would be continued and expanded. It believes that with a Hoover administration the only changes would be in horsepower, that it would be the same/car with a bigger and better engine." And he adds, and it is perfectly true, that "in Europe Hoover was and remains the most complete expression of Americanism Europe has yet encountered."

For nearly eight years Hoover has

ism Europe has yet encountered."
For nearly eight years Hoover has been Secretary of Commerce of the United States and has come into direct contact with every economic problem that we have.

I have been reading a book by a distinguished foreigner who has sought to penetrate to the springs of American life and especially to describe the secret of our great success. It is a book highly praised by many of our critics, including those who are regarded as foremost in what I may call a "debunking" point of view. I refer to "America Comes of Age" by Andre Siegfried.

Sensible Economy Policy

Sensible Economy Policy Sensible Economy Policy
Speaking of our industrial development and of government leadership, the author says that "At the close of the war a commission appointed under Herbert Hoover, Secretary of Commerce, to study the problem of waste in industry, came to the conclusion that production could be considerably increased and costs reduced—sometimes even halved—by a sensible policy of economy."

mensible policy of economy."

He points out that "following the leadership of the Government, workmen and employers both undertook to establish their enterprises on a normal, healthy and durable basis."

Describing the remarkable progress made, he refers to Mr. Hoover's contribution by saying: "Not merely was a general reform in industrial methods required and also desired by industry and by the public it served but it was sponsored by the Government with rare intelligence and moral authority. The name of Herbert Hoover, the greatest Secretary of Commerce the country has ever had, is associated with the program

of national economy. His efforts and breadth of vision are reminiscent of Colbert." This was written with-out any reference to American poli-tics or to this campaign. "Let Us Have Perspective"

Let us have perspective. The truth is that the American people now have the opportunity of putting at the head of our Government a man whose broad knowledge and executive capacity are recognized through-out the world. Knowledge and ex-pertness are not to be despised. Why not select the best we can get? If Governor Smith were running for the office of Governor of New York the office of Governor of New York the press and the platform would be full of praise of his knowledge of the government of that state. Of course, he has that knowledge. He has grown up in New York politics. He began by learning everything that was to be known about what a district leader of the dominant party in New York City could do. He then made the Legislature of New York his special study, and for years he has been the head of the state government.

I do not depreciate the advantages of that training, but it is a poor argument which says that we should elect a Governor because of his intimate knowledge of state affairs, but should not choose a President because of his rare and intimate knowledge of national affairs. While Smith has been working at Albany. Hoover has been working in Washington. It is said that Smith is a quick learner. So is Hoover. In his knowledge of the problems of the nation Hoover starts years ahead. If Smith were elected it would take him years to learn what Hoover knows now. I do not depreciate the advantages

"Problems Are Economic'

What are our problems? They are not political in the sense that we have special need of political maneuverings and clever political speeches. Our problems are economic. The less that they are made the subject of political catch-play, the better. The prosperity of industry, of agriculture, the exigencies of try, of agriculture, the exigencies of the shop, the farm and the office, the comforts of our home, the prospects of our young men and young women, depend upon these problems being dealt with on their merits by the dealt with on their ments by the most competent men we can get. At this stage of our history we need more than the background that we usually look for in a candidate for President with respect to general knowledge and political acumen. We need the special knowledge, the training and the talent suited to the nature of our exigencies.

nature of our exigencies. Herbert Hoover has the rare advantage of special and expert fa-miliarity with problems abroad as well as at home. He knows our for-eign relations thoroughly. If to be internationally minded means that we should know and appreciate world problems and have a world ok, Hoover is internationally

"Not Electing a Cabinet"

It is said that Smith would call able and experienced men to his aid. But we are not electing these men. Hoover can call able and experienced men to his aid. We are not electing a Cabinet. We are electing a President. When we elect the executive head of a great business or enterprise we try to get special competency and then let the trained and expert leader obtain his assistants and not his chiefs. In view of our economic situation, of the nature of our difficulties, of the prosperity we wish to keep so far as we have it and to secure it wherever it does not exist, we should have a man already equipped if we have the chance to get him. The special knowledge and training of Herbert Hoover point directly to the Presidence "Not Electing a Cabinet"

Hoover point directly to the Presi-

dency.

Hoover has shown in a most marked degree the talent for coperation. That is the essence of effective organization. Hoover perfected his extraordinary organizations for relief, which have been marvels of efficiency, by being able to infuse them with the spirit of co-operation. As Secretary of Commerce his aim has been, not bureauco-operation. As Secretary of Commerce his aim has been, not bureaucratic control, but to make the department a helper and an inspirer of common endeavors. He has sought the co-operation of all interested in American enterprise, producers and consumers, employers and employed. He endeavors to attain his ends not after the military manner, as a conqueror of hostile forces, but by eliminating an unwise and an unnecessary hostility and substituting the collaboration which is essential to real progress under democratic institutions.

Method Comes First

The significance of Hoover's activities as Secretary of Commerce does not lie in their extent, broad as they have been, but in their method and spirit. Intimate contacts with all sorts of groups have been established. It has been Mr. Hoover's ambition to have the department "come bition to have the department "come to act," as he has said, "almost as a service unit in the office of each of America's -business establishments and in the very homes of our people." Committees representing producers and consumers have been informed and their work aided by killful guidance. informed and their work aided b skillful guidance. Especially success-ful has been the effort to get rid of the waste that was caused by end-less and uneconomic variations in

Professor Siegfried, the close observer whom I quoted a moment ago, tells us that he found that "since 1921 in 50 different articles the Secretary of Commerce has re-duced the useless complexity of models by at least 73 per cent." The lumber industry estimates that wastes amounting to \$200,000,000 a year have been eliminated through the standardization of dimensions and the better utilization of by-products. It appears that there have been annual savings of upward of \$100,000,000 from the elimination of needless varieties, styles and grades of manufactured goods.

Success Due to Co-operation The success of this endeavor has

been due to its co-operative character. In the Bureau of Standards of the department, there is a division of simplified practice. But as Mr. Hoover has told us, the actual problems are undertaken only at the request and with the co-operation of industries and commercial bodies and the adoption of these ideas, except for limited fields in weights and measures, is wholly voluntary.

voluntary.

It would be impossible to attempt It would be impossible to attempt to picture the varied and successful work of the Department of Commerce in its many fields, but all its activities under Mr. Hoover have been dominated by the same purpose. What could hold greater promise in the field of governmental action than successful efforts of this sort? It is easy to capitalize the resentment which springs from abuses. It is not difficult to conduct a continual war of words over public interests and private rights without getting anywhere. The really difficult task is to establish a measure of co-operation by which all may be the gainers. of co-operation by wince be the gainers.

The interests of the community cannot be divorced from the inter-

Quotes Silzer

ests of the individuals who make up the community. When through co-operation you decrease unneces-sary costs, establish better stand-ards of qualities and service, aid in securing fairer returns for individ-ual effort you have some far in layual effort, you have gone far in lay-ing the foundations of a material prosperity in which all may share. In the relations between Government and business, Herbert Hooyer, has been the prophet of a new day. Hoover Is Resourceful One thing stands out conspicu-

ously in Hoover's undertakings, and that is his resourcefulness. His ingenious mind is always at work. He will always plan. His activities abroad and at home have astonished those who have worked with him because of his creative imagination. We hope for a continuance of prosperity, but if there should be adverse conditions, if any difficult situation should arise, the one man who more than anyone else could be deation should arise, the one man who more than anyone else could be depended upon to bring the widest knowledge and the greatest resourcefulness to the devising of means to meet the emergency would be Herbert Hoover. It wouldn't be necessary for him to appoint a commission. He doubtless would seek the widest co-operation and the best counsel. But he himself would be about as good a commission as we about as good a commission as we could get, already organized and in

action.

It would seem to be clear enough that his achievements would have been impossible if Hoover had not shown great capacity for leadership. The undertakings which he has successfully conducted would be accepted. cessfully conducted would have proved the ruin of any man who was

not a rare leader of men.

I suppose no one in recent times has gathered about him so many men of first rate ability as those who men of first rate ability as those who have worked with Hoover in his various enterprises, and particularly those who were associated with him in his relief work abroad. I have met many of them and I have yet to find one who was not enthusiastic over Hoover's leadership. Such leadership is the more difficult in voluntary, undertakings who controlled. tary undertakings when control ultimately rests on personal esteem.

The smoothness of all operations he conducted was due to his capacity to inspire confidence and loyalty.

Leadership Is Unique Leadership! In the difficult days following the armistice Hoover established a leadership which is unique in history. Frank Simonds, from whom I quoted a moment ago as a keen observer of European affairs, writes: "In that dark and now forcetten time the written line signed. forgotten time the written line signed by Hoover would permit a man to travel from the Russian border to the Pyrenees, though every known passport was a possible admission ticket to a local jail. New-born na-tions would trust freight cars across indistinct and lately erected fron-tiers only on the formal order of the present Republican nominee. Paris communicated with Prague and Budapest not by government wire lines but by Hoover lines. In his control was the supply wagon on which millions depended; and what-ever Prime Ministers wanted to do privately, in public they took his

Do you suppose Hoover could have maintained such an organization and control without extraordinary ca-pacity for leadership? He had his authority because he was a man who could carry through, one who could both plan and execute. He had the "supply wagon," but he knew how to drive, and he "delivered the goods."

No wonder Henry Ford says: "I am for Hoover for President because he has shown that he can size up any job, pick the right men and direct it through to success. Through 14 years he has been handling some of the biggest jobs in the world. He has made a success of every one of

Inspired by Humane Purposes It is most significant of all that his efforts have always been inspired by humane purposes. He does not create organizations for the sake of organizing. He does not form committees to go around in circles and employ words in futile reports. He employ words in futile reports. He is the farthest removed from devo-tion to red tape. His directness of method has always surprised those accustomed to the dilatory practices of officialdom.

He organized relief for the distressed and starving. In his activities as Secretary of Commerce his dominant thought has been that of the protection of the American home. He is seeking to be President not because he wishes political control or in the spirit of the laws. control, or in the spirit of the lover of the political game, but because there is always before his view the myriad American homes with their myriad American homes with their tollers on farm, in factory, in trade, and he wishes to serve them. He thinks of our economic problems in terms of help or harm to these homes. Thus all his plans, which are directed to material gains, have a spiritual meaning, and one cannot understand Herbert Hoover without appreciating the fact that above all else he is an idealist.

In this campaign the real issues.

else he is an idealist.

In this campaign the real issues are few. There is no issue in honesty. No one would have the temerity to suggest that Governor Smith is a more honorable man than President Coolidge. It would be an insult to one's intelligence to say that Smith is a more honorable man than Hoover.

Honest Men Condemn Rogue A "holier than thou" attitude, if it were assumed, would be absurd. All honest men condemn rogues. No one condones or has sought to condone any offense. The Republican Party was betrayed in its own house, but prosecutions have been had, conducted by able counsel selected by President Coolidge, to redress the

by President Coollidge, to redress the wrongs committed.

The Republican Party is composed of millions of our fellow citizens who believe in its policies as being of advantage to the country. If these policies are sound, if Herbert Hoover is an honorable and capable leader, it is futile to suggest that they be abandoned and the country intrusted to another and less capable leadership because of wrongs committed in the past which have been the subject of regular and strongly pressed legal proceedings instituted and carried through under the present administration. Neither the present administration. Neither

the present administration. Neither President Coolidge nor Secretary Hoover is in any way responsible for these wrongs.

The history of the campaigns of the Democratic Party is a history of abandoned issues. We went through three campaigns with Mr. Bryan. When I spoke in St. Joseph 20 years ago I dealt with the specific issues he raised, which have long since been abandoned by his party.

Quotes Silser

Quotes Silser

The other day a former Democratic Governor of New Jersey, Governor Silser, said that "between Mr. Bryan's inability to think deeply or to reach sound conclusions on important questions, his extreme blas and partisanship and his inability to compromise his views, he not only failed of election, but made it impossible for his party to succeed for many years." Governor Silzer said that the party must make its way

"along newer, sounder and different

"along newer, sounder and different paths."

Under the last Democratic administration we were unhappily involved in a controversy over our foreign relations. I say unhappily because I wish we could confine our party divisions to domestic matters and in our foreign relations have a country substantially united. That controversy grew out of the attempt of the last Democratic administration to commit the country contrary to its predominant sentiment. The result was a sharp issue. What has become of that issue? I see nothing of it in the Democratic platform. There is a faint and amusing reminder perhaps in the plank of that There is a faint and amusing reminder perhaps in the plank of that platform which says that the Democratic Party demands "freedom from entangling political alliances with foreign nations." Governor Smith tells us that "freedom from entangling alliances is a fixed American policy."

The Democratic Party has not only apparently abandoned its chief issue in relation to this subject, but it presents no definite issue as to foreign affairs.

Criticism by Democrats

Our opponents criticize, of course, but in a most futile manner. They accuse us of failing to do more than we did, or could do, at the Conference on the Limitation of Armament, although at the time both parties hailed what was done and the treaties of the Washington Conference were approved by both Democrats and Republicans in the Senate, and, as I recall it, with only one dissenting vote. The Democratic platform speaks of further efforts for the limitation of armament, but presents no program. We all desire to contribute to the limitation of armament and to extend the Washington treaties, and the Republican Administration has been the leader in this effort. No issue Criticism by Democrats the leader in this effort. No issue

With respect to Latin America the Democratic party and Governor Smith seem to forget the record of the last Democratic Administration. the last Democratic Administration. It was that administration which intervened in Santo Domingo and in Haiti. The Republican Administration inherited that situation and demonstrated its anti-imperialistic policy by perfecting arrangements for a withdrawal from Santo Domingo, which was effected. We would leave Haiti if we could. We are trying to help in Nicaragua at the instance of both the contending parties in that country and in the parties in that country and in the interest of a fair election in order that an independent and stable government may be established.

On Foreign Relations I notice that the Democratic plat-I notice that the Democratic plat-form in its plank on foreign policies declares for "protection of American lives and rights." I wonder what is meant by that. I had the honor to state at the last Pan-American Con-ference held at Havana as a dele-gate of the Government of the United States what I understeed to United States what I understood to be American policy in relation to Latin America. I stated that we yielded to none in the establishment of the ideal of sovereignty and independence for every one of the American republics from the great-est to the smallest; that we cherished no thought of aggression: that we desire to respect the rights of every country and to have the rights of our own country equally respected; that we did not wish the territory of any American republic; that we did not wish to govern any American republic; that we did not wish to intervene in the affairs of any American republic; we simply wished peace and order and stability and recognition of honest rights properly acquired, so that this hemisphere might be not only to hemisphere of peace but the hemisphere of international justice. That is the policy of the Republican Ad-

ministration. In the conduct of our foreign relations we all desire co-operation with other nations in the interest of We have given conclusive proof of that. The striking thing is that the Republican Administration has been in charge of foreign affairs for seven and a half years, a period of the greatest difficulty due to the unfortunate controversy which had arisen during the last Democratic Administration and to the problems incident to reconstruction following

Democrats Offer Nothing New

the constructive suggestion. Now when the issues of this campaign were made up, with all that had been done and sought to be done, foreign relations, except for a little talk to small purpose, are virtually left out so far as any definite and important issue is concerned. Considering the deep interest of our people in foreign affairs, that is an extraordinary omission. I regard it as a notable, if perhaps unwilling, tribute to the Republican Adminis-

tration.

In domestic affairs the paramount consideration is the prosperity of the country. Both parties recognize that. Every voter has something at stake. The chief effort of our opponents is to make it clear that they intend no harm. For unless they can allay the anxiety which has been bred by their past utterances and performances, their promises to be good this time will receive scant attention. It is also recognized that nothing so far as governmental acnothing so far as governmental ac-tion is concerned has such a direct

tion is concerned has such a direct relation to our prosperity as the tariff on foreign importations.

There has been a historic difference between the two parties in relation to tariff policy. The historic policy of the Republican Party has been that of a protective tariff. That is, duties laid to protect American interests and to maintain the American wage scale and the standards of living it makes possible.

Themografic Low Tariff Democratic Low Tariff

The historic policy of the Demo-cratic Party has been that of a tariff for revenue only. As long as MOTOR COACH to FLORIDA

9. Er'-rē-o.
10. "Prince of the Pantry."

I can remember this has been major division between the parties. But the great majority of the American people have come to recognize that the Republican policy is essential to the prosperity of the country and that the Democratic would be extremely injurious. So we find another abandoned issue, another monument in the Democratic

cemetery of lost causes; a cemetery, however, where ghosts still walk.

The last effort of the Democratic Party in tariff making was the so-called Underwood tariff in 1913. The called Underwood tariff in 1913. The great war saved us from some of its baleful effects and the injuries apparent after the close of the war, were stopped by the tariff act enacted by the Republican Administration in 1921. Apparently nothing so irritates our opponents as to suggest that they plan a return to the conditions under the last Democratic tariff, a tariff for trouble only.

tariff, a tariff for trouble only.
Governor Smith in his speech of acceptance unfortunately referred to the Underwood tariff. He said: "The Democratic Party does not, and un-der my leadership will not, advocate any sudden or drastic revolution in our economic system which would cause business upheaval and popu-lar distress. This principle was rec-ognized as far back as the passage of the Underwood tariff bill." This reference was naturally taken to mean that Governor Smith favored the principle of the Underwood tariff bill, the last effective action of his party on this subject. But when this import was found in his words, his faithful friend and manager Mr. Raskob, broke forth into profuse amentations.

Quotes Raskob

Recognizing the special importance of the policy of a protective tariff at this time, Mr. Raskob said:

"European industry getting into operation on starvation costs envied our rich markets. A sinister emer-gency threatened our whole struc-ture. Regardless of long-run theory, we face and shall long continue to face a new situation resulting from this emergency. Any American, whether Democrat or Republican, who would advocate breaking down our walls against this danger in our walls against this danger invites national disaster. The tariff
and immigration restrictions have
become integral and necessary parts
of our economic structure. Any
tinkering with their established
policy threatens perils no man can
gauge." And Mr. Raskob concluded
(addressing Dr. Work): "Permit me
to add this in candor; if you can
nrove the statement that Governor prove the statement that Governor prove the statement that Governor Smith at any time since he has received the Democratic nomination and accepted the Democratic platform has stated that the Underwood tariff act embodies the ideal method of handling tariff legislation, then I will resign my position and vote for Mr. Hoover. For, as much as I am devoted to other principles to which the Democratic Party is to which the Democratic Party is committed, I could not be so re-creant to my business training and convictions as to be responsible for an inundation of American prosperity through importation of prod-ucts of cheap foreign production."

Raskob Favors G. O. P. Polley That is sound Republican doc rine. That is what we have been talking about ever since I became a voter, and it is evidently meant that to return to the method of the Underwood tariff act would lead to "an inundation of American pros-perity through importation of prodperity through importation of products of cheap foreign production."
Governor Smith also says that he means no harm. He says he wants to take the tariff out of politics. He is opposed to a general tariff bill. He wishes specific revisions based on the recommendations of an impartial tariff committee. That has a pleasant sound. But our experience shows that his proposal is as ence shows that his proposal is as anything, it is that you can't take

the tariff out of politics. Congress has the power and will have its say, and what Congress does is necessarily in politics. And while th Democratic candidate and his man-ager are trying to win the election by abandoning the historic tariff policy of the Democratic Party, it is quite apparent that the party itself. through its effective representation in Congress, has not been con-

Platform Favors Competition The present Democratic platform "duties that will permit effective competition." How are duties to provide effective competi-

tion if not by the introduction of foreign products which will enter into effective competition with domestic products? It is this "effective competition" that threatens argiculture, that threatens industry. In the effort to obtain this effective competition is found the essential principle of the Underwood Tarff Bill.

Of course, it has always been asserted, as is now asserted, by the Democratic Party that it has sought an equitable distribution of the benefits and burdens of the tariff. It has always made the same protestations as to "fairness to all interests." It has always insisted that it sets." It has always insisted that it would safeguard legitimate industry. The value to be attached to these protestations is shown in what it has done. Whatever may be said as to particular schedules, the real differ-ence between the parties has been one of principle.

The Democratic Party has had its The Democratic Party has had its principle of a tariff for revenue only. It has endeavored to arrange tariff schedules so as to promote effective competition by the introduction of foreign products. The Republican Party has insisted on the protective principles to protect our standards of living from the debasement which would be due to the competition of cheap foreign production.

duction. Wants Strong Tariff

Wants Strong Tariff
I should like to see the tariff
made as scientific as possible, without the sacrifice of the principle of
protection. But the Democratic
Party, as a party, has been opposed
to the principle of establishing duties
to afford protection against effective
foreign competition. The Democratic
Party, which for generations has
stood for a tariff for revenue only
and in its last action for the principles and methods of the Underwood Bill, a party whose leaders in wood Bill, a party whose leaders in Congress continue to hold the same sentiments as those heretofore de-clared, cannot be trusted with car-rying out the principle of protection

to American interests.

The principle of stimulating "effective competition" through tariff changes would be especially injurious to our farmers. They need more protection and not less. This to American interests. was shown in the operation of the Underwood tariff. The problem of farm relief is most serious. But even here no definite issue is pre-sented. Governor Smith says he stands on the Democratic platform. stands on the Democratic platform. When he has been pressed for an exact statement of his views he has stated that he would appoint a commission which would work out a program. Now, I have long been advised by the language of diplomats of what "agreement in principle" means. Governor Smith has much to say about alibis, but the greatest of all alibis is "agreement in principle." in principle.

On Farm Problem The truth is that the agricul-tural problem is most difficult. It requires for its solution the widest knowledge, keen appreciation of the vast importance of our agricultural interests, deep sympathy with those who are suffering from low prices and high costs, and a determination to do all that is sound and practi-cable to afford relief. It is not a matter for political quackery. The farmers have nothing to gain from that but disappointments and more

I believe that Mr. Hoover is the best man in the country to deal with this problem. He has intimate knowl-

His speeches on this subject show both the grasp of the fundamentals of the problem and his determination to aid. In what possible view can Governor Smith be preferred to Mr. Hoover to deal with an economic problem of this complexity? The experiences of Governor Smith's life, his aptitudes, his associations, have been remote from difficult economic problems in general and agricultural problems in particular. It is clear that we need leadership and special skill in finding remedies. There is no swift road to the goal we seek, but I should to the goal we seek, but I should rather have Mr. Hoover's guidance than that of any other

Sham Battle Over Prohibition We have a sham battle over pro-hibition. The platform of the Re-publican Party declares for en-forcement. The Democratic Party threshed the matter out in its convention, with the result that it declared for enforcement. The Democratic Party did not commit itself, and its influential leaders were opposed. and its influential leaders were opposed to any commitment to a change in the Constitution or laws. Governor Smith knows that he has no chance of election without the votes of the South, which is dry. He is trying to gain the Presidency by getting enough wet votes in the North and East to add to the essential dry votes of the South, The drys are asked to support him on the ground that he can do nothing and the wets because he can do much. This is not, to my mind, a very commendable enterprise.

We cannot escape, if we could the verities of the situation. The Eighteenth Amendment is in the Constitution. It is validly there. It will take the votes of 36 states to change it. No scientific definition of intoxicating liquor can be framed

intoxicating liquor can be framed which will permit intoxicating liquors to be made and sold in this country contrary to the Constitu-tution. There is nothing within the limits of any possible valid definition which would satisfy the demands of the wets. That is the actual situa-tion and no amount of talk will

Smith's Election Means Confusion I do not say that the election of Governor Smith would not greatly intensify the demand for a change. I believe that it would also greatly impede efforts at enforcement. But insistent demands for changes would be met by insistent opposition, in which Democratic drys would play their part. We should have much agitation, much confusion, increased demoralization, and no better, but, I think, much less actual enforcement. Meanwhile, the Constitution would continue to stand inexorable in its requirements and subject to amendment only by the action of 36 states. For this reason I call this a

The question in this election is: Which is the better equipped man for the office of President with the

MODIFICATION

GLOUCESTER, Mass.—Bigotry and whispering campaigns were attacked by John Hays Hammond in a statement issued from his home here. He declared Governor Smith has been endeavoring to make capital out of religious bigotry, and will be defeated for his pains.

less to alter either the Constitution or the enabling act as any private citizen. Even if as President he could do anything, his party is solidly against him. So really his views on prohibition are not nearly so imporant as are his views, if he has any, on what the country should eat for breakfast.

"As far as I can discover, he has feated for his pains.

"We are hearing a great deal more about bigotry in this campaign than the subject warrants. There can be no defense of religious or any other sort of bigotry, but also there can be no defense of making capital out of religious bigotry, and that is precisely what Governor Smith is doing in this campaign in order to gain the votes of those who abhor bigotry.

any other question. He has become some kind of a tariff convert, although it is not of record that his party has changed its tariff principles. Smith plainly knows nothing whatsoever about the tariff, else he would not have declared with child-like simplicity that he was for the kind of tariff that would suit everyone.

For and Against McNary Bill votes of those who abhor bigotry.

"This is dangerous business and also it is very unfair to all Catholics and especially to the great numbers tion on this is so delicate that he

G. B. McCUTCHEON HAS PASSED ON

NEW YORK (AP)—George Barr Mc-Cutcheon, author of the Graustark books and many other novels and short stories, has passed on here. He was a native of Tippecanoe County, Indiana, and was graduated from Purdue University. In 1889 he became a reporter on the Lafayette (Ind.) Morning Journal, and from that moment writing became his

career. His first published novel was "Graustark" in 1901 and in what he then believed to be a burst of business acumen he sold that outright for \$500. After that he wrote steadily and for the next quarter of a century no year passed without a new book from his pen, and in many years there were two. There was a whole group of Graustark books, all of which had a wide vogue, and among the others "Brewster's Millions" was perhaps as popular as any.

Howie, of Buffalo, N. Y., who retired from the hotel business two years ago, adds a third.
Mr. Howie writes, in part, as fol-

my friend the late E. M. Statler, replying to my question as to why he did not put some kind of quick-replaced by the hotel-keeper mind. Service arrangement into his two Old hotels have been remodeled and hotels (he had only the Buffalo brought up to the minute as far as and Cleveland units going then) answered:
"'We must carefully consider how

far a first-class hotel can go in the department under the head of a direction of food service.'

"The disappearance of the bar, however changed everything touch-Statler's new Buffalo hotel, one of the counter and cafeteria, in addition to ing department has been added, and this most trying of methods of food be one of the wonder eating places of America in a city famed for its magnificent hotels, and would never have been thought of, or thought out, but for the Eighteenth Amendment. This last statement cannot be challenged successfully.

"Now, what happened to Mr Mr. Statler happened to the writer in a smaller but none the less intensive way. It has happened to every up-to-date hotel operator with the interest of his business at heart. I know I am well within the facts when I state that more money has made by the selling of booze.

Bars Not Always Profitable "Of course, there were a number of hotels scattered throughout the country that enjoyed an almost a highly profitable kind, but it may because the operator felt he must have a bar, whether it paid him or

ginning of the continuous erection of hotels in the United States is due absolutely to the workings of the Eighteenth Amendment, for as one prominent hotel man told the writer. Whatever differences we may have personally with the principles of personal liberty, this much must be said to the credit of the Amendment, and man his business by compelling him to concentrate on those things pertaining to his business that before he had given little or no attention to.'

"Other benefits of the Eighteenth Amendment are numerous. Talking to the owner of an up-town New York hotel who is out of all sympathey with the amendment, he said: If booze returned tomorrow I would never have it in my hotel.'

"His reasons are those of every sane man in business, among them that the hotel man is no longer re quired either to accept or refuse an

"Another reason is a quiet house is reasonably certain of a sound "To conclude, I should say that the night's rest. Smith's Wet Plan Held Impractical

Illicit Liquor Would Pour In on Dry States, Miss Hood Tells W.C.T.U. Session

PECIAL TO THE CHRISTIAN SCIENCE MONITOR EVANSTON. III .- Out of a halfcentury's experience combating the legal liquor traffic, Miss Helen L. Hood, associate of Frances Willard, told the Illinois W. C. T. U. convention here at the home of the National W. C. T. U. why Governor Smith's theories for the amendment of prohibition laws would fail in practice.

"Governor Smith thinks that by

ocal self-government and states rights real respect for law can be assured," said Miss Hood, who is state president. "We who have been in the saloon reign know that this is untrue. Before the Eighteenth Amendment three-fourths of our states were dry, but from the wet states a stream of illicit liquor was poured into the dry territory. This would happen again if the states are given the power to declare what the standard of alcohol should be. "Governor Smith, in this advocacy of the return of wine and beer as a moral issue, involves the protection of our children's morals. Let every White Ribboner who goes to the ballot box Nov. 6 remember that we all are pledged to stand true to the Eighteenth Amendment, and this no only for the children of today, but

Television Limitations Are Emphasized in R.M.A. Report

Exhaustive Survey Indicates Need for Use of Short Waves-Reproduction Now Crude

This is the first of a series of six authoritative articles on the status of television experiments. The articles are sponsored by the Radio Manufacturers' Association, Inc., and are written by R. P. Clarkson, an outstanding radio author. These articles are designed to give complete information on television, truthfully and authoritatively, from the Radio Manufacturers' Association, which includes nearly 300 radio manufacturers representing approximately 98 per cent of radio products presented to the public. The R. M. A. recently concluded an exhaustive survey of television, and the articles by Mr. Clarkson are the result.

the United States approximately at Schenectady, on a wavelength of 640 radiocasting stations, ranging in 379.5 meters, and WRNY in the New power from five watts up to a permitted maximum of 50,000 watts. also, as follows: These are only the stations in the 2XAL—New York—30.9 meters. so-called "croadcast band" which 2XAD—Schenectady—21.96 meters. 2XAF—Schenectady—31.4 meters. officially extends from 199.9 meters to 545.1 meters, but is commonly Washington, D. C., operating on 46.7 spoken of as the 200 to 600 meter meters, and carrying a program of band. Many of these stations have dancing "short wave" associates, or companon stations which send out on wave- simple form. There are several stalengths below 100 meters the same tions in the middle West contemplat programs, at least during certain ing this type of radiocast this winter.

Any television reception by the genvolves one of two things. Either the in Chicago on 61.5 meters has sending of images must take place within the 200 to 600 meter band or the public must buy special television receivers. If the sending of television images should be done in the most of the up-to-date receiving sets The Schenectady radiocasts are of could be used for reception, and in half hour or full hour duration sevmerely plug in a device to make the ent receivers necessary to get every signal visible instead of audible. For one of these radiocasts, ranging as the experimenter, this can be done.

However, the number of stations the results to date are crude and difficult to receive, the apparatus to create the image is cumbersome, involves moving machinery which in turn requires electrical connections entirely apart from the nections entirely apart from the set. Incessant attention is required for instant to instant regulation of the device, while no one device are 48, which bids fair to become can be used except for the particular most popular. The speeds range from station it matches, so that there can 450 R. P. M. at WRNY to 1260 at be no possible appeal to the general WGY. This means from about 8 pic-

The first step in any wide, general development of television will be for the establishment of sufficient transmitting stations so that a purchaser, wherever he may live, has at least one possible program he can tune to.
And, of course, he would prefer a in the encouragement of experimen-And, of course, he would prefer a in the encouragement of experimen-choice. Then, instead of the very few tation, there is no general tendency minutes occasionally given to a for radiocasting stations to enter this radiocast at present, there would be field. In fact, it is a question whether radiocasts of such length as to permit some degree of enjoyment. It is stations now indulging to continue, also obvious that there must be a except as suggested by one of the standard adopted by the various stations which will permit a receiver to be used equally well on all of them. Otherwise, there can be no nationwide use or sales of television re-

MANY SMALLER ORDERS HELP SHIPBUILDERS

End of Big Passenger Ship southeast Europe and in normal times pierce clear into the center of Programs Finds British Tards Still Busy

SPECIAL FROM MONITOR BURBAU

LONDON-With the launch of the Canadian Pacific liner, Duchess of York, recently there comes practically to an end the last big passenger shipbuilding program on hand in this Unique Fair of country. This ship, built at the Clydebank Shipyard of John Brown & Co., was preceded by the launch of a smaller ship for the Canadian Pacific coastal service in British Columbia and makes the eleventh ship launched for this company in the space of one year and a day. The tonnage represented amounts to about 140,000 gross tons and it is one of the largest series of shipbuilding contracts placed in recent years.

Nowadays the launch of a ship is invariably accompanied by the query whether there are other ships waiting to follow on the vacated berth and in many cases recently the answer has been "no." The Canadian Pacific have one more high-class liner on order, the contract having been placed a month or two ago, and it is known that they will be order-ing soon another ship, said to be as large as 35,000 tons, making her easily the largest in the Canadian

Foreign Orders Increase

Fortunately, during the last few weeks there has been a recrudes-cence of new business which has not been confined to one district or to one type of ship, but is spread fairly well around the country. One of the most heartening features of this revival is that foreign owners are again finding British shipbuilding they have not had ships since the

Several high-class passenger ships are to be built by Swan Hunter & Wigham Richardson for French own-ers, and it is significant that these owners found the British terms more favorable than they could have got ing the existence there of special Little Greece has got an artificial to encourage owners to keep their going to be behind in this great art business at home. Then again, there has been a fair amount of cargo tonnage ordered which indicates that owners are a little more hopeful of the whole world.

In opening the exhibition Dr. Pickowners are a little more hopeful of the prospect of trade in the near ard said: "Speaking purely as a

pany have recently booked orders here. On perusing the various exfor two ships for North American owners, the Court Line are having another ship built by the Northumberland Shipbuilding Company which is alone and those composed of more than one textile material along with art silk have improved within since its reconstruction, has obtained with art silk, have improved within a considerable amount of business. Another shipyard which is going again is that of Workman Clark & Co. of Belfast, who recently had the first launch they have held since the motor passenger ship Bermuda was launched in 1927.

Contract for Motorships

Line, for which Andrew Weir & Co. are managers. Four of them are to be steamships and four will be motorships employing the Sulzer type of engine for which Workman Clark & Co. and the way in which they can be steamships and four will properties which go to make an acceptable fabric not only the luster and the appearance but the "feel" and the way in which they can be predecessor of the university, was a connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships, and it was not without interest to recall that the first student to end in the show was connected with one of the most important industries of Yorkships. engine for which Workman Clark & and the way in which they can be concerned by the control of the firm's sible, one is lost in admiration at the success of the workers in this field."

The vice-chancellor (Dr. J. B. Baillie) stated that during the term of office of the present chancellor, 19 office of the present chancellor chancellor, 19 office of the present chancellor, 19 office of the present chancellor c totaling 200,000 tons. Indeed, with the Bank Line contracts Belfast is probably better off for work than any other shipbuilding district.

The Blue Star Line have ordered

from Cammell Laird & Co., Birkenhead, a cargo steamer of 12,000 tons. Recently the Blue Star Line had one of the largest building programs on of the targest building programs on hand in the country, with five pas-senger and cargo ships of 13,000 tons, and the fact that the company is ordering one cargo ship is a re-minder that these big passenger ship programs, although welcome at the time, leave many vacant berths as the launching dates come round.

Lack of Big Programs Most of this business, however, is of a different class from the passenger programs, and taking it alto-gether it will barely replace the large number of ships which have been launched in the last month or so, although it will go a long way toward providing employment during the winter months. The nature of the business, however, is such that it is split up among many shipyards and comes from a large number of indi-vidual shipowners, whereas what some of the bigger yards would like to see would be one or two large programs from the big shipping com-panies, such as would compare with the Canadian Pacific's contract. those like the Cunard and P. & O., which were in the nature of replac-ing war losses.

BULGARIAN SEEDS SOLD IN BUDAPEST

SOFIA—A very fine seed store, situated on one of the main streets of Budapest and owned by a Bulgarian gardener, B. Boneff, has just been opened by an impressive ceremony at which the Bulgarian Archbishop from Vidin, Neofit, officiated. Many prominent Hungarians were present, and expressed their appreciation of the fact that a Bulgarian has become one of the first seed producers and distributors in Hungary, which is known as a country with advanced agricultural methods. This achievement of a Bulgarian gardener in a strange land is in keeping with Bulgarian traditions. Bulgarian gardeners have settled Bulgarian gardeners have settled near most of the largest cities in Russia. There are colonies of them around Budapest, and so many of them about Bucharest in Rumania that a vegetable garden there is called a "Bulgareeya," while they also work in Croatia and about Salonika and furnish much of the milk lonika and furnish much of the milk and many of the vegetables for Con-

Artificial Silk Opens in Britain

Great Achievements of the Chemist

SPECIAL TO THE CHRISTIAN SCIENCE MONITO MANCHESTER, Eng.-An artificial silk exhibition recently opened in Manchester, represents an important mile-stone in the history of this in-dustry, being the most comprehensive demonstration of the fabricathat has ever been assembled in this country. Many leading manufac-turers contributed to the display The range of fabrics and colorings was striking.

At the opening ceremony, Lord Colwyn said: "This industry has come to stay and it will make its mark upon the world. And we are not alone. Other countries have got this fine artificial silk business. I see that Japan is growing and developing. Italy made in 1927, 22,000 tons of artificial silk and they employed 35,000 workpeople; Japan is doing one-fifth of that now, and those of you who know what Japan traordinarily serious question which is and the power and enterprise of could bring the country to arms, alcosts to be as low as anywhere and are coming back to yards from which that little country know that they will develop it.

Brazil Starts Factory

Brazil has started manufacturing artificial silk. They imported it up to last year, but now they are making it themselves. Norway, where we get the wood-nuln from to make a set of the wood-nuln from to make a set of the wood-nuln from to make a set of the wood-nuln from the the wood-n worable than they could have got the wood-pulp from to make artificial their own country, notwithstand-silk, has started to make it herself.

ist, at any rate the chemist made the initial discoveries, but we must not lose sight of the achievements that were necessary before the industrial They have also received a contract development of the factory could proto build eight ships for the Bank duce the results which we now see

Germans Found to Be Hard Workers

British Mission Impressed by Willingness of Men to Exert Themselves

SPECIAL PROM MONITOR BUREAU LONDON-"Germans, whether employers or employed, are working as hard as they possibly can," declared Sir John Sandeman Allen, who recently returned to London after leading a party of Conservative M. P.'s on a tour of Germany at the invitation of the German industries. The industrialists are taking a bold view with a long vision. The hours of work are considerably longer than those in England, the wages are considerably less, and the standard of living is, of course, nothing like that

obtaining in England.
"From this it appears evident to me that British industry will have to organize itself more thoroughly and modernize itself thoroughly if it is going to stand up in competition. This is all the more important because the full weight of the German effort in world markets has not yet

torian crop has been thrown almost entirely on the Melbourne market, and By 1933, He Claims, Country Will Have Good Roads, Irrigation and Power, and Industry Will Be Improved and Expanding

MADRID-The recent manifesto to the country issued by the President through the medium of La Nacion has not elicited the enthusiastic response not elicited the enthusiastic response this paper foretold for it. It filled nearly eight closely printed columns, but its substance, while vibrating with optimism, has not served to stimulate public opinion nor to steady the falling value of the peseta. The outstanding feature of Gen. Primo de Rivera's declarations is his decirion. Rivera's declarations is his doctrine that the control of the country must be in the hands of those citizens who have joined the Union Patriotica, and to achieve his objective he has de-cided that four-fifths of those who are in the employ of municipalities and provincial corporations must bein persons, regardless of their politics,

The general hopes that by 1931 the Consultative Assembly will have prepared its report on the question of constitutional reform, so that the Nation may then look forward to returning to constitutional conditions once more. His vision of Spain in 1933 does not, he explains, require the aid of much imagination. By that time, there should be 25,000,000 Spaniards "cultured, comprehending, hard-working, tolerant and inspired by the divine love of the Christian doctrine, constituting a great society positively democratic."

The general goes on to say that expanding, thanks to the power obtained from harnessed rivers. Taxes will have decreased by economies in

PECIAL TO THE CHRISTIAN SCIENCE MONITOR poor will be receiving the close consideration of the state. The manifesto terminates with an expression of thanks to the South American republics for their testimony of affection to the mother country on the occasion of the recent celebrations.

The press, which has recently been given a little more if only temporary liberty to air its feelings in regard to the political situation, inquires how it is, now that all are agreed that the old régime has passed away once and for all, and the army of old politicians has been broken up, that the country cannot be permitted to return to normal conditions. It is not necessary to seek far for a reply: neither has the general a successor worthy of the country's confidence, nor has he created conditions such as would warrant his relying on the electorate for a suitable choice. In the circumstances, eager as he is for retirement, he must perforce continue at his post in the hope that the solution of his difficulties will present itself in time.

the color of the coat. Little speckles of bright colors or small polka dots are the favorite designs. It is rarely that one sees the larger patterns used for the daytime frock, although Paris

THE first nip of frost in the air sends one's thoughts to the winter wardrobe, the most important item of which at the moment is the street costume, or, as it is commonly called, "the winter ensemble."

Indoor frocks can wait for a bit but the cooler weather calls at once for a heavier coat and frock for outdoor wear. Time was when a winter coat in a dark color, black, navy blue, leading to the color and a frock of jersey or fine woolen reps in a different color, the coat being lined with the same material as the frock. These tweed coats are ideal for morning wear and for traveling by train or motor, for they are warm and uncrushable and extremely comfortable with their big patch pockets, ample sleeves, and collar of wolf or skunk or a long tweed scarf lined with the material of the frock. As mart ensemble of this type designed by Chanel consists of a coat of diagonal tweed with a collar of wolf or skunk or a long tweed scarf lined with the material of the frock. The skirt was circular, cut on the edge in little scallops which were bound with white velvet and the collar of the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock, although they are often used for the daytime frock as a brilliant crystal or rhine-stone buckle at the side or front of the waistline. Sometimes they are cut on the princess line with a back. One of these was seen recently in the new shade of blue, which is a cross between navy and French blue, printed in little white polka dots. The skirt was circular, cut on the edge in little scallops which were bound with white velvet and the contraction of the fook.

When not made on the princes line, these velvet frocks have a plain, slightly bloused bodice and a skirt tassel of the jersey hanging from the side of each. Although the vogue of the two-piece sports frock is decidedly on the wane, it is used by several of the leading houses in the quite straight across the back and form of a tweed skirt and a blouse ripple into flounces at the sides and front.

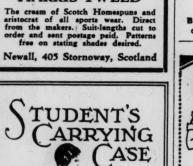

Geometrical Trimming

Crêpe-satin continues in favor for the afternoon frock, the dull and shiny surfaces still being combined This tweed ensemble is, of course, in all sorts of interesting designs in designed only for the morning shop- bands and curves. Several of the deping tour, for sport or country wear signers are using this idea in bold and for traveling. The dressler type effects along the lines of modern art. of winter ensemble consists of a long One particularly striking example coat of broadcloth, zibeline or simi- of this is being shown in the Drecoll lar woolen materials or velvet, and a collection, in which square and trigown of velvet, plain or printed, fine angular incrustations of the dull side wocien reps, tusli kasha, crèpe satin of the satin are used on a frock of the brilliant surface. Black is the favorite color for these satin frocks such as marocain or romain. The but they are also seen in blue, brown, coats are, for the most part, built on green or fawn color matching the

the familiar long, straight lines, al-Crêpe-marocain and crêpe-romain though the more elaborate ones, are favorite materials for the winter especially those of velvet, often have frock and these, like the velvets, are circular front or a godet at the often used in tiny printed designs, side. These velvet coats are usually which are quite new and very attractive. Among the woolens, fine reps and the softer fabrics of the prolific kasha family are the favorites. Fine jersey is also used but only for the simpler type of costume, for no mat-ter how delicate, this material will always remain more or less in the "sports" class. The woolen frocks are simply made but little feminine touches, such as a collar and cuffs and broadtail—are used for the col-lars and cuffs of the cloth coats, and embroidered mull, narrow ties of a great deal of originality is displayed in these. There are all sorts rows of tiny buttons often in shiny of novel variations of the popular brass or steel, give distinction and kerchief idea, in collars of these chic to the simplest of them. rows of tiny buttons, often in shiny

The Melodiousness of Nature

pupils in school, the teacher came climbing laboriously up small debehind me, and after listening for a grees of sounds, only to descend at a moment to my singing, rewarded me single leap to the bottom. . . . With whispered stern correction that I ries, but within narrower limits. . . . was singing an octave too low. I suppose he was correct. I knew not then what he meant, except that I felt that the level of my singing must be something terrible. In my innocence and ignorance I had thought I was singing bass. If it were not a mustical thing to do at least not a musical thing to do, at least it was a manly way to sing. And since, after the manner of the teaching of that day counsel did not fol-low correction, I thereby resolved that henceforth music was not for me. I gave myself to other pursuits. The world was large. There were many things to know. To this day the most I can say concerning music is that "I do not understand, I love." I have moved among my fellows enough, however, to know that even

in my poverty I am richer than some. There are those who find no mystery or music in sound. It is all that in nature there is sound. With that elemental distinction they rest. except perhaps they seek to subdue the harshness of the former while taking little trouble to understand Even as I say these things, how-

HAT day was a fateful one for within the bounds of this major me, some thirty years ago now, fourth, drops can play surprising and when, singing with my fellow varied melodies. You will hear them with a thump in my back and a the varying pitch the time also va-

by Bach. Drip drop, di-drap, di-drep. If this last interpretation be denied to Huxley sure am I that I can-

not give it. Our children's children may have power to interpret this ultimate meaning, if it be there. Meanwhile I, in my elementary way, can have joy at least in the melodi-ousness of nature. At least I know enough for that. The right to this pleasure has been excellently stated by Grey in his "Fallodon Papers" when he tells that "who takes pleasure in Outdoor Nature, will observe the one simple rule, which is far too taken as a matter of course. They know that in cities there is noise and pleasure in Outdoor Nature without destroying or disturbing." The me-lodiousness of nature is for those in whom silence has her habitation. Emersonian like, we must yield "to the perfect whole."

On a recent vacation I determined to enjoy this pleasure. Rememberever, I know that I am speaking ing a chance experience last sum-only for a rapidly diminishing miwhich I seemed to catch more than a technical knowledge and appreciation of music are coming to be regarded as requisites of a balanced substitution. The recover of a balanced substitution of the regarded as requisites of a balanced substitution. education. The sequential results of this will undoubtedly be manifold. enjoy to the full the melody of one summer's day. I would be a listenerthis will undoubtedly be manifold. I here mention only one because of its relevance to the topic I have in hand. It is that this leaves the covered that I was listening for more in hand. It is that this leaves the covered that I was listening for more in hand. It is that this increas-ing attention to music will prob-noise of the city came not, where ably lead the oncoming generation into a richer appreciation of the flowing water, the song of birds, the melodiousness of nature. We have trained ourselves and our youth to look abroad upon nature, but not look abroad upon nature, but not melodice in my own community, hown cadences and emphases, I found notice in my own community, hown ever, probably due to the reason I ever, probably due to the very probably due to the wind soughing through the trees.

In this mingling of many sounds, billiowing up and down through many cadences as a Yale in modern days varies, as a Yale ever, in the elementary ever in the elementary every e

'None can tell how sweet, How virtuous, the morning air; Every accent vibrates well! Not alone the wood-hird's call. Or shouting boys that chase the

Pass the height of minstrel skill, But the ploughman's thoughtless

Lowing oxen, sheep that bleat, And the joiner's hammer beat Softened are above their will. . . All grating discords melt, No dissonant note is dealt. Echo waits with art and care, the air, And will the faults of song repair."

This is the melodiousness of nature. To some this may seem a poor reward for the price of silence one has to pay to get it. But for one man I can speak otherwise. Though no audible voice said to me in those be days when free from the ca-cophony of the city I will enter into those places where noise is not, but where all sounds are tuned to melodiousness.

Scarlet as Flowering Pomegranate

My grass sandals are lined with scarlet,— Scarlet as scarlet as what?

The Chinese girl, selling them to me,

Said in forthright, emphatic English, While I bothered to pick

and choose,-"They are all big. Everybody has hig feet. Meekly acquiescent That size is after all Not exacting in grass sandals, I still persevered In choice of color for lining. 'Nobody's going to-see Inside of your slippers,' Encouragingly she reminded me But I chose these, With lining as scarlet as-what? Soles lined with scarlet, Toes with grass green. . Unimportant things, Little Chinese girl, Are of great import. Grave centuries of patient ancestry Have taught you that. I apologize that my young country, Making you a saleswoman, Makes you try to hurry me! But deliberately

I chose these. This coolie coat is grass green, With sleeve bands of blue,— Blue, blue as indigo,— Bands lined with scarlet,-Scarlet as what?

The flowering pomegranate is blooming. Scarlet as what? Oh, yes,— Scarlet as flowering pomegranate! "They want them big. Why not? They can see at the heel The gay lining, scarlet

I can walk in the back garden.

As flowering pomegranate! I can see the inside of the sandals-Can see the lining of the indigo Can see the gay crêpey blossom

"Let us go on unto perfection"

PROBABLY everyone longs to that Christ Jesus gave the command progress. Much effort is exable to say definitely just what they expect to achieve by progress or what they believe it will bring into their experience. Nevertheless, this desire, rightly governed, is true and necessary. The writer of the epistle to the Hebrews clearly focused this native desire of the human heart when he said, "Let us go on unto perfection.' Although mortals desire to pro-

gress, they have mistakenly supposed that what they want is material success or material power, through which to procure for themselves contentment and happiness. They do not see that what they really desire is that they may "go on unto perfection," to spiritual completeness or conscious unity with God; and they do not know that this is what they are yearning for, because they have been falsely educated to believe that life and intelligence and substance are in matter and that satisfaction must therefore be found through material means. They have therefore ignorantly or willfully or mournfully gone on seeking for what does not exist, while blindly yearning for realized and enjoyed when sought in the only way it can be found.

When it is once seen that there toward that which is perfect, it is also understood that perfection must be spiritual, and cannot be material. This much discerned, it is readily seen that God, the only perfect One, is the divine Principle upon which all true desire and endeavor must rest; for progress means, necessarily, beginning with God as the source of all that truly exists, and continuing in this spiritual thinking, according to His unchanging law. Instead of leading one into more of materiality, true progress requires the surrender of materiality, in or-

progress. Much effort is ex-pended in the hope of going for-ward; yet few, perhaps, would be ness; and all these things shall be added unto you." And it is on this basis alone that the healing works which the Master required of his followers can be accomplished. Concerning this distinction between the real and the unreal, Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 353): "All the real is eternal. Perfection underlies reality. Without perfection, nothing is wholly real. All things will continue to disappear, until p: lection appears and reality is reached." And she continues, "When we learn that error is not real, we shall be ready for progress, forgetting those things

which are behind." Even to be ready for true progress, then, one must be willing to exchange false material concepts for spiritual ideas; and at the outset actual advancement is thus found to mean something entirely different from what human fancy might indicate as desirable. But, trusting in God, divine Mind, as the source of all good, one finds that God's law provides for and governs the unfoldment of spiritual ideas, and, consegood which is just at hand to be quently, destroys all that is opposed to spiritual perfection. Of the need for thus understanding God's law, its demands, and its power, Mrs. Eddy can be no real progress except it be says in Science and Health (p. 233): "Every day makes its demands upon us for higher proofs rather than professions of Christian power. These proofs consist solely in the destruction of sin, sickness, and death by the power of Spirit, as Jesus destroyed them. This is an element of progress, and progress is the law of God, whose law demands of us only what we can certainly fulfil." This going "on unto perfection" is,

when rightly viewed, a joyous and beautiful experience, because God's law of progress is also the law of love; for God, perfect divine Principle, is also divine Love, and spiritual man, God's likeness, is the reflection of divine Love. One's true progress, therefore, whatever human circumstances, position, or conditions may be, is measured by one's understanding and demonstration of divine Principle, Love, and God's spiritual law. It is such a test that Mrs. Eddy gives where she says in Science and Health (p. 239): "To ascertain our affections are placed and whom we acknowledge and obey as God. It divine Love is becoming nearer, dearer, and more real to us, matter mance of the Forest," "A Sicilian is then submitting to Spirit. The objects we pursue and the spirit we manifest reveal our standpoint, and show what we are winning."

Only Team in Pacific Coast Football Race With Clean Slate

PACIFIC COAST CONFERENCE FOOTBALL California. ton State

MOSCOW, Ida .- All but one of the 10 members of the Pacific Coast Conference have opponents for this Saturon the championship race. Or gon State College and University of Washington meet at Seattle, with the former expected to win. University of California at Los Angeles makes its first journey into the Northern Division to University of Idaho at Mos

formidable competition with the Olympic Club of San Francisco, made up of former college stars. Cheered by its first important victory, 20 to 0, over Montana School of Mines, the Mon-tana University team attacks Montana State College at Butte in the annual

U. C. L. A. Meets Idaho California at Los Angeles, the new Conference member, anticipates the Idaho game as its best chance to break into the Conference victory 122 column. J. L. Fleming '29, halfback and captain, will be back in the lincup. His speed and leadership will be a big factor. Last Saturday U. C. L. A. decisively defeated its old Southern Calicornia Conference rival, Pomona Column 27 to 0. Development of some new backs brightens Idaho's outlook for als game. H. E. Owens '30, J. S. Haliday '30, and A. M. Nordby '30, all halfbacks, should figure prominently. All are light men and promise the type of playing Idaho has lacked, as they possess ability to execute wide they possess ability to execute wide end runs and speedy off-tackle, cutback plays. The Vandal backfield carries a preponderance of line smashers, but too few elusive

Washington State has light competi tion in the College of Idaho; Stanford indulges in little more than a work-out against Fresno State, and Southern California is not expected to have trouble with Occidental. In each of these games, however, there lurks the possibility of a minor team, keyed to the highest pitch, catching a big fellow

The Conference received three big surprises in a lump. Most important was California matching Southern California in strategy. Second was the 47-to-0 Stanford victory over haho and third was Oregon's equally crushing 27-to-0 defeat of Washing-ton. The California surprise, plus Ore-gon's decisive elimination of Washingon from championship consideration

aspirations. Oregon rests this Saturday, while California will be busy with the Olympic Club team, conqueror of Stanford. Oregon rolled up over four touchdowns against Washington.
California was able to complicate the championship outlook by solving the Trojans' best play, the offtackle dash, in which D. E. Williams '29, quarterback, carries the ball with J. J. Hibbs '29, Trojan captain, who has been playing end or tackle, leading the way in removing opposition. This Williams-Hibbs combination has been the Trojan standby, enabling Williams to attain the rank of greatest ground gainer in the Conference. In the first half of the ball 69 times for an average of 5.5 yards. Early in the first half of the California-Southern California same it became apparent to the 75,000 spectators. California-Southern California game it became apparent to the 75,000 spectators that the contest was evenly matched. Once the Fears smashed as far as the Trojan 22-yard line and in fall Wood Jr. will enter the Harms-field Wood Jr. will en the last quarter a desperate Southern California passing attack advanced to the 19-yard line, but play was mostly Talbott of Cleveland, O., and James Talbott of Los Angeles, Calif., each

Talbott of Los Angeles, Calif., each have challenged for the trophy. week-end undoubtedly was by Stan-ford. Superiority of Idaho in weight, OHIO STATE PLANS 10 pounds per man, meant nothing to the Cardinals. This marks Stanford as one of the strongest teams ever seen on the Pacific Coast. Stanford worlds of reserve power. In the last quarter a lineup composed of second Enlargement of Sports Plant and third-string players smashed out

Regulars Held Back

Coach G. S. Warner started his regular backfield, C. L. Hoffman '29, full-hoack; Herbert Fleishhacker Jr. '30, quarterback; R. F. Sims '29, halfback, and R. L. Fentrup '30, halfback, and R. L. Fentrup '30, halfback, toombination found it could not gain through the center of Idaho's line on a power attack. Three times the Vandalar with the content of the company of the company of the content of and R. L. Fentrup '80, halfback. This combination found it could not gain through the center of Idaho's line on a power attack. Three times the Vandals, with W. L. Kershisnik '80, full-back, and P. F. Hutchinson '29, halfback, doing exceptional playing in stopping Hoffman's plunges, turned the Cardinals back. Then Stanford the Cardinals back. The Cardinals back the Cardinals back the Cardinals back the Cardinals back. The Cardinals back the Cardina

Washington State and Oregon have the best chances of Northern teams for first-division honors. Outplayed the first half by Oregon State last Saturday, the Cougars were complete masters the last half. Though victory was by the soant margin of 9 to 7, the Cougars displayed strongth and alertness. The wide runs and punting of D. C. Macdonald '20, halfback, were spectacular in Washington State's iouchdown and field. T. R. Rohwer 189, quarterback, ran the team admirably and carried the ball on some see their way clear to proceed with enlargement of the athletic system.

Architect plans for the new building is lacking in the second half, but according to tradition they hold have been better than a 19-to 18 term. When the sound will be made public within two weeks.

AMATEUR SKATING UNION APPROVED

NEW YORK Daniel J. Ferris, secretary-treasurer of the Amateur Ath-letic Union of the United States, an-nounced Tuesday that the proposition of admitting the Amateur Skating Union of the United States to allied

skating in this country. The A. S. U. was organized last winter as a successor to the dissolved International Skating Union, but several officers of the defunct I. S. U. refused to admit the passing of that body and con-

FINE WELCOME FOR GERMANS

Berlin Soccer Team Defeats Isthmian League Team--Varsities Are Preparing

BY WIRELESS PROM MONITOR BUREAU LONDON—The international estrangements which were legacies of the World War have almost faded out of European sport, a fact brought home forcefully last week-end by the enthusiastic and sincere welcome given here to the first German association football team seen in England ciation football team seen in England since 1914. Ten thousand spectators assembled to witness the match be-tween a side representing the Berlin Football Association and one representing the Isthmian League—a powerful combination of amateur clubs

a monorn restaurant. In accordance with continental custom, a banner woven in the isthmian Leagues colors was presented ceremoniously to the guests of honor, and in returning the compliment the Germans asked the league's honorary secretary to ac-cept as a souvenir a handsome bronze

Britain has been a back number in international lawn tennis so long that people rubbed their eyes this week to read head lines about a "possible Davis Cup final in England." The pos-sibility referred of course to decision of the French lawn tennis authorities that they would forfeit the right to defend the cup in France and cut out public tennis altogether rather than pay a heavy amusement tax on a game which they believe has done so much to advance the country's prestige in the world of sport. English clubs con-ducting open tournaments have long been subject to an amusement tax ex-

competitive swimming has practically ended until 1929. As a final in a busy season, England defeated Scotland at water polo at Dundee, 6 go: s to 1. E. H. Temme, the insurance clerk of E. H. Temme, the insurance clerk of Channel-swimming fame, scored one goal for the victors and the others were hurled into the net by James Hull, the English captain; J. G. Hatfield, the famous veteran—he scored thrice—and E. P. Peter, Scotland's solitary point came from E. L. Kidd. The same evening C. Stewart Belmont, Olympic Club, established a new Scottish record by covering 500 yards freestyle in 7m. 8s.

TO DISCUSS AMATEUR STATUS
TORONTO. Ont. (By the Canadian
Press)—The status of amateur athletes
who accept tuition in universities in exchange for their athletic prowess will
be discussed at the annual meeting of
the Ontario branch of the Amateur Athletic Union of Canada, here, on Friday.
A resolution will be submitted urging
that the union define the status of
such athletes in view of the fact that
a number of cases have been reported.

PALANGIO TO NEWARK MONTREAL, Que. (P)—Carol Palanglo, member of the squad of the Canadiens of the National Hockey League, has been sold to the Newark ("uh of the Canadian-American Hockey League, Carol is a brother of Peter Palangio, also on the Canadiens.

Football Rules in Old Days Contain Many a Laugh Today

University of Vermont Alumnus of '74 Unearths Few of Gridiron Guides of His College Days for the Amusement of Present-Day Fans

BURLINGTON, Vt.—Back in the good old days of the 70's football was a much simpler proposition than at present. At the University of Vermont half a century ago the annual interclass football game had all the thrills without the rules of a modern set to. Louis Shaw of the class of 74 light responsible for unearthing a list of the catch it otherwise than on the fly. mont half a century ago the annual interclass football game had all thrills without the rules of a modern set-to. Louis Shaw of the class of '74 is responsible for unearthing a list of these old guides of gladiatorial combat for use in the football arena. Here they are:

Rule First—The privilege of the first warn is to be decided by tossing up a cent or five-cent piece, the side having the warn choosing its side of the field. Rule Second—The ball having been placed in position in the center of the

respective sides at a distance of at least 30 feet from the center of the field until the ball has been warned.
Rule Fourth—After the ball has been warned, no player of the class having the warn is allowed to touch the ball until it has been touched by a member of the opposing class.

relating to the distance to be lost snaw to void.
Rule Ninth—In case of any violation not above specified the offending party loses the warn.
Judges for 1876—Louis Shaw '74. for 1877—John B. Wheeler '75. Umpire—A. Torrey '74. Captains—Noratio Loomis '76: Arthur M. Wheelock '77.

Wisitors a victory, 4 goals to 1.

It was team work of the best, and it served to show the vast strides made by the soccer players of Central Europe since the war and which has been appreciated only by those touring sides from England that have returned nome with deteats to explain.

In the evening after the game the rival teams sat down to a banquet at a nonorn restaurant.

INDEPENDENT CONTROL IS AIM

Women Golfers Are Seeking This Goal-W. W. G. A. Meeting Is Held

CHICAGO (A)-A United States national women's golf association with independent control of all golfing affairs of the fair sex in America is the goal toward which feminine golfdom is headed, according to ex-

nual meeting of the Women's West-ern Golf Association.

This body is successfully independ-ent of men and always has been, but the national championship is now held by direction of the United States Golf Association—a golf contest for the women of the country held by the men. Among those who favored such a plan was Mrs. Robert M. Cutsuch a plan was Mrs. Robert M. Cut-ting, retiring president of the Wom-en's Western and member of the women's advisory committee of the U. S. G. A.

Mrs. Cutting, who gave way to Mrs.

Paul Walker of Chicago as presiden of the W. W. G. A., said after adjourn ment that she spoke only personally, out that it appealed to her as a splen did idea to have the women

did idea to have the women in full control of their own affairs. Even down to city contests.

Under such an arrangement golf would be controlled under a system similar to the National Government. The national body would control in a general way and conduct the national champingship towards. general way and conduct the national championship tourneys. State organizations would handle regional affairs, while, under state control, there would be city and district associations, all free of the oversight of men, except as to rules of the game.

There was no official consideration of the subject, and, aside from elections, a few minor amendments to the constitution and reports the meeting.

constitution and reports, the meeting Akiba Rubinstein, Poland..... 3 57

BERLIN (AP)—J. R. Capablanca of Cuba was ousted from the lead in the second consecutive. Cuba was ousted from the lead in the second consecutive time by defeating International Chess Masters' Tournament Tuesday when Rudolph Spiel-Canadian champion, in the finals at mann of Austria won two of the four Indian Hills Club; individual medal ment Tuesday when Rudolph Spiel-mann of Austria won two of the four adjourned games that were played off. score honors to Mrs. Lee Mida of Chiadjourned games that were played off.
He has an advantage of half a point over Capablanca. The latter did not play Tuesday. The summary:
Sixth Round—Richard Reti, Czechoslovakia, lost to Aron Nimzowitsch. Denmark, who won a piece.
Eighth Round—Arch Nimzowitsch, Denmark, lost to Rudolph Spielmann, Austria, who won a pawn.
Eighth Round—Richard Reti lost to Akiba Rubinstein, Poland, who won a pawn.
Mayfield Club, Cleveland, and Oakland Mayfield Club, Cleveland, and Oakland

record score of 73 on the No. 1 course, one above mens' par.
Invitations for the holding of the 1929 championship were received from Mayfield Club, Cleveland, and Oakland Hills Club. Detroit. It is likely that the committee will select one of these cities for the event and a tentative plan is afoot to hold it within a week of the national women's championship, of the national women's champ

of the national women's champlonship, which may be played in one of those two cities also.

Miss Glenna Collett of Providence won the national title for the third time this year by defeating Miss Virginia Van Wie in the finals at Hot Springs, Va., and the event is due to come to the midwest next summer.

SPECIAL FROM MONITOR BURBAU CHICAGO—Mrs. Paul Walker of the Exmoor Country Club was elected president of the Women's Western Golf Association at the annual meeting held here. She succeeds Mrs. R. M. Cutting who served two terms. Cutting, who served two terms. Cutting, who served two terms. Mrs. Charles A. Klotz of Indian Hills Golf Club was elected first vice-president; Mrs. Sarra M. Richards. Flossmoor. Country Club, second vice-president, and Mrs. H. F. Holloway, Olympia Fields Country Club, recording secretary.

Invitations to the better women tended for the annual medal play tournament of the association, it was decided. This tourney may be extended from a three-day 54-hole event to a four-day 72-hole affair, to make an event similar to the men's open

E. Y. C. COMMITTEE APPROVED The third general meeting of the Eastern Yacht Club for 1928 was held Tuesday evening at the Harvard Club of Boston, at which, in accordance with the bylaws, the nominating committee, appointed by Commodore Charles Francis Adams, consisting of William T. Aldrich, James M. Hunnewell, Louis Bacon, Fracis Gray and Benjamin C. Tower, was considered and approved. This committee will bring in its report at the annual meeting in January of the 1929 officers.

PERKINS WINS TOURNEY Joseph Stein, one of the leading professional golfers of New England, has resigned his position with the North Shore Golf and Tennis Club, and will seek reinstatement as an amateur.

**Perkins '3 S. A. defeated Louis Brewer, instructor, in the finals of the Class A singles of the Harvard fall tennis tournament, Tuesday, by a score of 6-4, 6-3, 6-4.

Mexico-an Apologia

A Review by WALLACE THOMPSON Author of "The People of Mexico," "The Mexican Mind," etc.

Mexico and Its Heritage, by Ernest ing into that strange, medieval up-Gruening. New York: Century. \$6. heavel of a people toward ideals helf

plete statement of the Mexi- background, is carefully drawn and can problem. He has achieved a remarkable piece of work, and his dent of the Mexican situation. complete, graphically told and interuglier side of much of the revolu-

bibliography on those two periods, case, and in many instances they are he has taken for fact only the critical and hostile. It is as true of the the author himself. Madero, that Mexican documentary and of value and importance, al

Exact and Painstaking

Mr. Gruening went to Mexico first were most exact and painstaking, he failed, as most contemporary ob-servers fail, to realize that the Mexicans of today cannot yet look on the the constructive chapters of Mr. past with the eyes of an historian; Gruening's book. Here, at last, the Gruening shows so well, not historical. With this warning, vital because its relations to the revolution and its of the skill and enthusiasm with which the author has presented his incomplete picture of their earlier ter is full of important information, incomplete picture of that earlier era, let us go on to the friendly analysis which this fine piece of literary work deserves.

The historical section is the chief basis for the adverse criticisms made above, although some of the later presentations of United States-Mexican relations, especially in the sections on Foreign Relations, Politics and Land, are manifestly lacking in the fine sense of balance dsplayed of Mexico for the next decade" and by the book as a whole. In reading "for a more promising future than " by the book as a whole. In reading these historical pages, and those dethese historical pages, and those devoted to the Indian Heritage, it seems five centuries." His calmly reportorial that Mr. Gruening thinks no good at presentation of some of the unlovely all ever came from the white man, and no evil ever from the red man. inspire the casual reader with equal While presenting in sympathetic eye enthusiasm, perhaps, but certainly the difficulties faced by the revolution of the sincere honesty of Mr. Gruening's tionary governments in raising the study will inspire considerable faith selecting the most sententious of his level of the Indian mass of Mexico, in his Gruening finds only condemna- amounts to the same thing. tion for Porfirio Diaz, because he did not work the miracle of widespread Government of Mexico make an intereducation that the revolution has not

The author's mistakes throughout this section indicate the secondhand sources of his information, as when he seriously states that the Spanish born whites of the colonial period were called "gachupines," which was Aztec nickname much like the modern Mexican "gringo" for Americans, the proper name of the caste of Spanish-born whites having been "peninsulares," or "those from the (Iberian) Peninsula."

Fair and Balanced The discussion of The Revolution markably fair and balanced presentation of a subject still extremely difficult to evaluate, and shows the in-tense study and the conscientious. The volume is a ne striving for the essential facts that the author put into his five years of preparation for this volume. Here, for the first time in either English or Reitain the goal of his lifelong am-Spanish, has been set down fairly an estimate of the various factors enter-

it had to be imported. The backs of the title-pages bear variously the legends, "Made in France," "Printed in Germany." It is, of course, appro-priate enough that the little Bible offered in the language of the peo-ple, should have been printed at the scene of the Leipsig Disputation. But why should "Paradise Lost" and "The Golden Treasury" reach us by way of France? American publishers!

Are ye men, or mice? The titles include also a "Little Webster" (18,000 words), an English-French Dictionary (12,000 words), 'Hamlet" and "Macbeth," "Don Quixote," the "Arabian Nights", and stories by Maupassant. There are elastic bands to hold the books in the case. The Bible, which is the largest of them and printed in the smallest type, comes provided with a reading glass. The rest are evidently considered legible without such aid. ing. Whether Mr. Minkus is startthe world been right for all these
tained in this series deponent knowtained in this series deponent knoweth not.

> Doubleday, Doran, who are always doing something to rouse us all from lethargy, are sending this fall "blurb Island for ever, etc." editor. The colors are of wondrous

spot into the hands of the Philis-tines. It reads: "The Marvelous Miniature Library."

Don't take our word for those col-ors. We are not sure the lady wasn't gulling us. If you'll write to the pubiature library that puzzles us. Appoint to be able to make some-parently, like so many good things, thing besides book notes out of them.

Culture Versus Cannibals

"avertissement" on the title its narrow path. page conveys far better than we The dedication runs, "To the im-"Don can, by its succinctness and style, mortal memory of Candide." While the kind of novel he has written:

"Being the Story of a Gentleman of Gulliver's Travels; but, this apart,

young Oxford man of county family who, as a result of private sentimenthe time up to his old game of telling us what is wrong with the world, what we ought to do about it and how much hope there is of our ever doing it. Three-quarters of the way through the book the reader is shamefully tricked. Rampole Island with its savages and their ludicrous tabooes are discovered to be a hallucination, a symbol of that state of black pessimism from which the human thought is seen to be strug- larger than its predecessors. NEW STRENGTH MANIFESTED IN STOCK MARKET

Bullish Enthusiasm Created by Various Favorrable Developments

NEW YORK, Oct. 24 (P)-The bull vement in stock prices went merily on its way today with at least oscore issues pushed into new high on a tremendous volume of

omprehensive in recent weeks, emacing a wide assortment of steels, coppers, cans, public utilities, specialties and merchandising

rails, specialties and merchandising issues.

More than 1,000,000 shares changed hands in the first hour, with the accumulation of orders so large that the ticker fell 45 minutes behind the market by early afternoon.

Although cautionary advices continued to pour forth from several of the large commission houses, the public appetite for stocks showed no signs of diminution.

Today's advance was stimulated by the publication of a series of unusurily favorable earnings reports, Packard, Graham-Paige, General Electricand the Northern Pacific Railroad being among the many corporations to show substantial gains over last year.

Wall Street also was immeasurably relieved by the further easing of credit conditions. Call money was in plentiful supply at the renewal figure of 6 per cent, and time money also was available at a substantial concession below the rates of a week and a month ago. The reduction in commercial demands, reflected in the decline of borrowings at the Federal Reserve banks, and the recent imports of gold gave promise of relatively easy rates until the approach of the holiday season.

Coppers moved steadily forward with demand stimulated by talk of higher dividends on Kennecott and some of the other shares. New peak prices were registered by Anaconda, Cerro de Pasco. Chile, Kennecott, Granby, Miami and Seneca.

Establishment of a new high record by United States Steel common at 166½ revived interest in the steel group. Spang Chalfont's 5-point rise to 53, as contrasted with a recent low of 26, was accompanied by reports of an early merger with A. M. Byers, which incidentally fell back 4 points on realizing.

St. Louis Southwestern, Union

zing.
St. Louis Southwestern, Union Pacific, Wabash and Rock Island led the advance in the rails.
The closing was strong. The up-The closing was strong. The upward movement became more vigorous in many stocks in the final hour, especially in the oil and copper groups. Sinclair Oil was bought in blocks of from 5000 to 25,000 shares, and touched 34%, the highest figure in five years. Greene Cananea Copper advanced 10 points, and Stewart Warner up 6 points to 110, a new high mark. Western Union had a strong gally and R. H. Macy and Gimbel Brothers added considerably to their early gains. Montgomery Ward fell 8 points. Sales approximated, 4,700,000.

notable civic enterprises, a member of Holland Lodge No. 8, New York City, and Grand Master of the State

caceful uses intended by the giver. The report of the Masonic Emiam C. Heim, secretary, shows that luring the past fiscal year 1619 nembers and dependents had found mployment through the bureau's eforts, the average cost being \$4.09. The best month in this service was April, 1928, when the number of places secured was 151; the second places secured was 151; the second was December, with 149, and the third last March, when the total was 145. During the first six months of the current calendar year 507 permanent positions were secured, the manner positions were secured, the classic of which aggregated \$399, salaries of which aggregated \$399,-433. This was done at an average cost of \$6.66, so that for each dollar spent by the bureau the person placed realized \$118.42. In the same period 317 were placed in temporary positions, for 30 days or less, com-pensation for which it was impracticable to compute.

Brother Edward S. Evans of Pales-ine Lodge, No. 357, of Detroit, Mich., amed for his 21-day-around-the-world trip by airplane, was also Master of his lodge last year. His louble records are now emphasized by another instance, the case of Brother Leland Peoples of Justice Lodge, No. 549, of California, who as the rare distinction of being the irst Master of a lodge in San Fran-isco to be a commercial aviator. Brother Peoples operates a Travelair piplane of his own from San Francisco's municipal airport at Mill's cield.

Chairman J. Edward Allen of the

ommittee on foreign correspondence of the Grand Lodge of North Caro-lina estimates that there are throughout the United States some Freemasons, not residing within ordinary visiting range of their respective lodges. Among these enforced absentees we may naturally expect what is generally admitted to be the case that there are the greatest losses in membership. thoughtful brethren sincerely believe that this situation could be partly remedied by permitting dual membership. Dual membership, under discussion in the Grand Lodges of this country for many years, is now permitted in New York, Virginia, Massachusetts and some other juris-dictions. Foreign jurisdictions freely

permit multiple membership.

Brother Palmer Hunt, Master of Clyde Lodge, No. 341, at Clyde, N. Y., is a member of the local Board of Education, and he invited the high school orchestre to assist in the school orchestra to assist in the program arranged for the lodge to nmemorate the birthday of Brother washington. The music so provided was so warmly appreciated that at a later business session of the lodge it was voted to award a sum of money every year in the future to purchase music for this orchestra. Further consideration of the matter resulted in the offer by the lodge of a scholarship award to the student in the high school of that city who attains the highest standard of progress and does the best work in music during the current school 4 4 4

A beautiful memorial to Brother Albert Pike, Arkansas poet of the Confederacy, author of "Dixie," "Every Year," and many other appealing poems, a Masonic ritualist and leader, was dedicated at Calvary Church, Fletcher, N. C., on Sept. 30. General Pike was Grand Commander of the Supreme Council, Ancient and Accepted Scottish Rite of the Southern Jurisdiction, from 1859 to 1891.

The oldest living member of Norfolk Lodge, No. 1, Norfolk, Va., Frank H. White, better known as "Pop" White to his associates, was honored on his fifty-fourth anniverhonored on his fifty-fourth anniversary as a member of the craft by a celebration of the lodge. Mr. White is now a resident of Washington, D. and up. Double room with board for two by the week at economical figure. Apply Box 222. but always makes the trip to Norfolk on the anniversary of his hav-ing been a Master Mason. At the celebration this year he was enabled to witness the conferring of the Master Mason's degree upon his son, Charles J. White, by the Norfolk Lodge as a courtesy to National Lodge, No. 15, of Washington, D. C. A Bible which has been in the family for more than 100 years was used in conferring this degree.

There are over 100,000 Freemasons in each of 12 Masonic jurisdictions. In their order of numerical strength these jurisdictions are New York, England, Illinois, Pennsylvania, Ohio, Michigan, Texas, California, Indiana, Massachusetts, Missouri, Canada (or rather Ontario, to use the geo-Canada graphical name and not the Masonic expression) having a total membership of 2,254,085, or over one-half of all the world's Freemasons.

The four numerically strongest Masonic jurisdictions in the world are New York, England, Illinois and Pennsylvania, with an aggregate membership of 1,160.769, or over onefourth of all the Freemasons on the

Brother Jesse M. Whited in his report for the committee on correspondence of the Grand Lodge of California, October, 1928, says that Dr. William F. Kuhn, who was one of the outstanding Masons of the country, divided Masonry into three classes. First, the signs, grips and words class, who hold that if a man can perform the gymnastics and has a phonographic record in his mind of certain words to be recited on occasion, he is a well-posted Mason. Second, the King Solomon class who believe that King Solomon was a member of the Craft, wrote its New York City.

By ROBERT I. CLEGG 33° Editor-in-Chief, The Masonic History Company DWARD WAGNER of Albany, ritual and that all his wives were N. Y., has received a beautiful members of the Eastern Star. Third, sword, a famous Damascus the philosophical class, whose heads are so encompassed by a fog bank of guard, as the emblem of his Masonic office. Brother Wagner for 18 years has been Tyler of the Masonic bodies at the Temple. He is also Grand Sentinel of the Grand Chapter R. A. M. The sword is said to have had a remarkable history, having had a remarkable history, having been given by General Lafayette to Gov. De Wittt Clinton of Eric Canal fame, as well as a pioneer in other notable civic enterprises. in the purposes of the divine creator, faith in humanity, and faith in our City, and Grand Master of the State of New York from 1806 to 1819. There is a persisting tradition that the sword was presented by Brother De Witt Clinton to Market Park from 1806 to 1819. zation consisting of an army of approximately 4,000,000 men, selected Witt Clinton to Masters Lodge No. 5 of Albany and that it subsefor their intelligence and moral worth. The possibilities of such a quently disappeared but has now been recovered and again put to the

Reconsidering the Costs of War

THE announced intention of France and Great Britain to proceed to a settlement of the reparations problem is an international decision of major importance. During the ten years which have elapsed since the armistice many attempts have been made to set the figure of the total indemnity to be paid by the defeated states. The war, however, left them with many complicated economic problems; reconstruction and recovery were difficult and delayed. The allied statesmen have long known that Germany could not pay "the whole cost of the war" but their peoples, staggering under heavy tax burdens, have not wished to listen to this truth. Now, however, in the beginning of the fifth, or so-called standard year of the Dawes planwhich commenced on September 10 last, the decision has been reached to refer again the reparations question to an international committee of experts organized along lines similar to the Dawes Committee of 1924, which proposed the tentative arrangement which is now in opera-

The Dawes Committee experts in 1924 were confronted by a problem of extraordinary complexity. Germany was on the point of financial collapse. The inflation of her currency had been unprecedented. The payments of reparations had been suspended and the outlook was extremely gloomy. The situation was so complicated that it was quite impossible to reach any definite decision on the total amount that Germany would be expected to pay. As the experts said in their report, they did not wish to fix this amount at "so low a figure as would be quite unacceptable to her creditors or unwarrantably favorable to Germany." They also pointed out that to agree upon a definite figure without regard to the economic surplus that Germany would have when she recovered financially would be unwise. Furthermore, there were the difficulties in respect of foreign exchange. How could internal payments which Germany might be able to make be converted into foreign values for the creditor powers without making the German currency unstable?

In the successive reports of the Agent General for Reparations, S. Parker Gilbert not only has described the accomplishment in the execution of the experts' plan but has emphasized the application of the creditor powers to te final settlements, perts themselves put it, "as soon as circumstances make this possible." The indications are that in the opinion of Mr. Gilbert and the British and French Cabinets the circumstances referred to are now present.

The dispatches from Paris give figures as to the total payment that the British and French Governments apparently have in thought. These figures are of no great importance. The experts' committee, which will be appointed, will hardly be bound by any specific instructions. The present full annual payment under the Dawes plan is 2,500,000,000 marks a year. That, on the basis of 5 per cent interest and amortization charges, represents a principal value of 42,000,000,000 marks, or \$10,000,000,-000. The figure suggested by the Paris dispatch is \$8,000,000,000, which represents some concession from the tentative calculation of the

When the American Debt Funding Commission conducted its negotiations with foreign governments and fixed their payments to the United States, Andrew W. Mellon, Secretary of the Treasury, insisted that the reparations and debt payment were separable. The European governments which share in reparations and which make payments to the United States are not inclined to accept this thesis. France, for example, before she accepts the Mellon-Bérenger agreement wishes to know her expectation from Germany. If France is to pay the United States for sixty years, she will wish to receive payment from Germany for the same period. In the dispatches from Europe, therefore, relating to reparations, there are frequent references to the inter-allied debt problem. The conditions of the debt, however, may be postponed until after the experts' report on the terms of the final reparations are known. When this settlement is reached, the debt problem will be greatly simplified. But in its simplified form it will require careful consideration and possible readjustment by the Government of the United

Pullmans and Prosperity

N EMINENT economist once observed that A one of the surest means of determining the degree of business activity was to note the volume of Pullman car travel and to compare the relative ease or difficulty experienced in obtaining lower berths. When it was easy to obtain Pullman space, he reasoned that this indicated commercial travel was light, a fact which, in turn, pointed to a recession in business. There is much to commend this simple but ingenious analysis of current conditions, although the country's growing prosperity is converting more and more day-coach travelers into Pullman passengers.

In a recent description of equipment added to its Twentieth Century Limited, the New York

Central Railroad announced that during each month for the past two years the patronage on this train has shown a steady increase, and this in spite of the fact that the extra fare charged is the highest on any of the extra-fare

trains operated by the railroad. If the number of Pullman travelers be an index to national prosperity, there need be no apprehension of the condition of business. Between Boston and New York the extra-fare Merchants Limited of the New Haven Railroad is the most popular train on the line and Pullman space is always difficult to obtain unless advance reservations are made. In the New York-Philadelphia run of the Pennsylvania Railroad, the number of parlor cars on the hourly trains has increased in recent years, while the number of day coaches has decreased. The trend is toward greater luxury in travel, and despite a 50 per cent Pullman surcharge, which accrues to the railroad companies rather than to the Pullman Company, travel in sleeping and parlor cars shows a normal increase annually.

The loss in rail passenger traffic has been largely in the day-coach travel, and although the gain in Pullman business in no way offsets the greater loss in the former, this is a railroad problem and in no way controverts the novel conclusion reached by the economist who based his observations on national prosperity and the condition of business by the number of persons standing in line before the window marked "Pullman." With that line constantly lengthening, it is apparent that luxury articles are in increasing demand.

Naval Friendship

YOW that the Franco-British attempt to find a naval modus vivendi has failed, the next move is being considered. Diplomatic correspondence between European countries and the United States will probably prove nugatory in the actual circumstances. A fresh conference would be untimely, even were the United States likely to agree to it. But certainly it appears advisable, while keeping the door open for eventual discussions, to refrain from any further precipitation. These problems must be discussed calmly. The essential thing is to keep a friendly atmosphere, and it is not believed that the atmosphere is so greatly troubled as certain reports would indicate. Nevertheless, it would probably be the better course to regard the present incident as closed and approach the subject later in normal conditions.

France, for the purpose of finding support for its theories at the preparatory disarmament commission, accepts temporarily the British view. The basis of the bargain is said by the eminent French-writer, Pertinax, to be the withdrawal of British criticism of the French system of military conscription to which France traditionally holds and which might be jeopardized by British attacks at Geneva.

Moreover, France in latter years has turned its attention to possibilities on the Italian frontier. Unfortunate rivalry in various domains has sprung up between France and Italy, and hopes of a speedy settlement of the disputes, entertained at the beginning of the year, have not been altogether fulfilled. It would be well to dismiss as baseless the malicious rumors which suggest that France and England have an understanding in the air which would enable France to direct its attention elsewhere, and also to dismiss the suggestion of any Franco-British accord in the Mediterranean. But it does remain true that France would resist a fresh attempt to place it entirely on the same naval footing as Italy.

Roughly, the Franco-British thesis is to regulate the construction of larger cruisers and submarines, while the American thesis would provide for a general limitation. The United States, without multiple coaling stations, cannot afford to agree to a multiplication of smaller vessels. and would, by means of fixing the total tonnage, oblige navies employing many smaller units to offer compensation in the shape of a corresponding reduction of the number of larger

From the French viewpoint, the discussion for the restriction of the smaller units would have for result an unpleasant debate with Italy; for, while Italy would insist on equality, France points out that its overseas possessions, vastly superior to those of Italy, give it the right to a higher standard. It will be seen that with the greatest good faith and good will the problem is extremely complicated, and it is not easy to determine what shall be the next move. The effort at mutual comprehension is obviously the first requisite.

Education for Industry

THREE hundred years ago one of the greatest of English statesmen said that a people could be happy under any system of government, provided it were well administered. Without accepting this statement in all its implications, it is safe to say that a great deal of the energy which is devoted to discussing the theoretical superiority of one form of social and industrial organization over another might perhaps be sometimes more profitably employed in bringing any present proved form of organization to as high a pitch of efficiency as it can reach. The general temper of the Trades Union Congress at Swansea, with other points of evidence, has shown that this is a fact which is now beginning to be appreciated; and it is only another aspect of the same realization which is illustrated by the finding of the Balfour Committee on Industry and Trade, that the future of British industry depends not so much on political change as on the acquisition of able and properly trained men. It is not the machine that matters so much as it is the man who

Concerning the higher branches of organization and research, this is a proposition that would be readily admitted; but it is not always remembered that it is equally true of practically every grade of industrial employment; there is indeed scarcely any job of so mechanical a nature as to render intelligence and training of. no account.

In this connection the educational plans of the City of Sheffield are extremely significant; for they propose the opening of a technical

school of a kind hitherto unknown in England. It will be in part designed to furnish a steady flow of students for the applied science degrees of the local university, and it is hoped that later some of these students will be able to do research work of high practical value. But this will be only the less important branch of the activities of the proposed school; principally it will be concerned to provide a body of men likely, not so much to add to the world's store of technical knowledge, as to be capable of applying to the needs of local industry the knowledge already available. It is hoped that the local Chamber of Commerce will send representatives to assist in the drawing up of the curriculum, so that the education given may be of the maximum industrial value; and it is intended that special emphasis shall be placed upon the chemistry of the metals used in the Sheffield trades.

It will not be the aim of the new school to manufacture captains of industry, though what its by-products may turn out to be no one can tell. It is, however, confidently expected that an army of skilled workers who will bring Sheffield industry to its maximum efficiency will be trained therein. The experiment will be followed with much interest; if successful, it might lead to a national development that could exert a highly beneficial effect on British trade

Why Are Book Reviewers?

HILE authors write and publishers publish, there will be reviewers to inform the reading public about new books, and critics of the reviewers to comment, usually adversely, on the way they do it. Assuming that there was only one new book, one potential reader, and one reviewer, there would no doubt be a unanimity of opinion about reviewing. Assuming two books, two readers and two reviewers, the reading public would begin to disagree about the reviewers. One has only to think in terms of three books, three readers and three reviewers to see how unsurprising it is that book reviewing has become nowadays a frequent and almost inexhaustible topic of discussion and suggestion. There is a distinction drawn between the "reviewer," who is held to be of a lower order of those who write about books, and the "critic," who is held to be of a higher order. One of the common criticisms of the reviewer is that he thinks himself a critic; another is that he thinks himself a wit.

These charges—that reviewers have fallen into the "deplorable habit of mistaking themselves for critics," and that instead of concerning themselves with the book, they are "always aiming at wit"—were recently formulated, with others, by members of the Library Association in England meeting in hopeful attempt to improve reviewing from the point of view of librarians. The reviewers, it appears, do not tell the librarians what they want to know about the books. But the librarians were not agreed as to what a librarian wants to know. One, for example, wanted quotations. Another suggested that the reviewer make the same kind of a report that the publisher's reader makes to the publisher after reading the book in manuscript. Another wanted to know "what qualifications the author had for writing the book, why he exists as an author, and what he adds to the sum total of human and spiritual experience and knowledge.'

In view of the considerable number of books and authors that he must needs consider in a limited time, this is a large order for the average book reviewer; and whenever he filled it he would not be unjustified in thinking himself a critic. But the larger company of those who will read his review are not librarians. Books are written and read with pleasure that add little to the sum total of human experience and knowledge; the reviewer who weighed it would need a delicacy of perception comparable to those ingenious instruments of precision that exact savants use in their laboratories. There are many readers in this larger public who would be more interested in such reports as are made by the publisher's reader; but these reports often mislead the publisher himself. One may say with reasonable confidence that what everybody wants to know is whether the book-light or profound, fictional or nonfictional-will interest him; that the best any reviewer can do is to set forth whether it interests somebody else. And this he must first of all do in a way that interests his own editor, whose point of view is sometimes as different from that of a librarian as any point of view can be.

Fortunately, the reviewers appreciate these conditions and bear up under criticism. For without them, how would the potential reader know anything at all about most of the new books?

Random Ramblings

Vermont Yankees are moving off the old home farms and Finns are moving on. The Finn is hard working and thrifty; so is the Vermont Yankee. Mr. Coolidge, himself a Vermont Yankee who didn't stay on the farm, might explain the seeming paradox.

That blacksmith who has forge and anvil rigged on a truck and who tours the countryside shoeing horses seems to have excellent claim to the honored title "journeyman blacksmith."

Appraisals of the "new Tammany" in recent books confirm the opinion that the tiger does not change his stripes any more readily than the leopard his spots.

Registration figures all over the United States indicate that not only is the silent vote to be heard on Nov. 6, but also it is going to be vociferous.

The real question is not "Are you for or against prohibition?" but "Are you for or against liquor?"

A Day With the President

He has to be. Directing the destiny and executive policies of more than 100,000,000 people is the herculean task which he voluntarily assumes when he moves into the White House, the executive mansion of the Nation, with an office force of thirty-odd clerks and directors, a coterie of servants and a corporal's guard at every

The President is probably the most harassed executive in existence. His time is not his own. He is at once the public mouthpiece and the public vehicle, to be talked to, at and for, or ridden at pleasure. When he retires into the seclusion of the forest, the world insists on blazing a beaten path to his front door. When he visits some city the streets were thronged with the curious. He is one of the most important executives in the world, yet be is upbraided and commended in the same breath, ridiculed and praised, crowned and uncrowned.

The Capitol City is the mecca of tourists, the natural camping place of conventions and of association gatherings, the playground for lobbyists, the meeting place of politicians and lawyers, famed and unfamed, the battle ground of national and international affairs, the arena of press agents, the whirlpool of politics, and the local broadcasting station of the Nation's business. 1 1 1

People coming to Washington want at least a passing glimpse of the President. Those with political affiliations must shake hands with him. Every man, woman or child who has gained favorable notice in the public press, and become a national celebrity, seeks an audience with him. Foreign dignitaries and lesser notables, by virtue of their international position, are entitled to an audience.

His desk work alone occuples a great portion of his time. Appointments to office in Washington and to governmental positions throughout the country, and to the diplomatic and consular service, the army, navy and marine corps, comprise a large portion of the Chief Executive's desk work, but more time is consumed in arriving at such recommendations, for he is constantly conferring with innumerable hosts of men and women about such appointments. The various executive departments in Washington, employing some 60,000, are constantly evolving some business matter which requires the President's consideration. Congressmen and senators are constantly conferring with him concerning matters relating to constituents, proposing legislation or discussing bills under consideration by both houses. Heads of associations and federations are constantly urging upon him some new legislation or discussing matters pertaining to business interests throughout the land.

Cabinet meetings and talks with press representatives consume parts of two days in every week, while every new project with a national scope or of state-wide interest is brought to the President's attention. In fact, so great is the demand upon the Chief Executive's time that one marvels that he can accomplish anything like all that is demanded of him in twenty-four hours.

Yet, when we examine the President's daily routine, we find it quite orderly and arranged in a strictly systematic Every affair of business requiring his attention is dispatched with clocklike precision. A schedule of engagements informs him what he has to do each minute and hour of the day. To his secretary falls the task of budgeting the President's official time, and this schedule s rigidly adhered to.

The President breakfasts at eight, lunches at one, and dines at seven, except on formal dinner occasions, which are always at eight. He usually gets into his swivel chair in his private offices in the west wing of the White House along about 9 o'clock in the morning, looks over his urgent mail, and then sees people from about 9:30 a.m. to 1 p. m. About 12:30 the President has to see a great many people who want to pay their respects. While many people entertain the idea that these daily visits are public, all visits are really by card or by letter, and when crowds go through in groups of fifty to one hundred or more, they all have to be accounted for by somebody who can be depended upon. Watchful guards constantly weed out the unknown, undesirable and suspicious characters from the ranks.

Even this handshaking with the President is systematized. On a certain Thursday recently the President shook space of twenty-eight minutes, with the aid of a staff of

THE President of the United States is a busy man. | expert guards who know how to officiate at such functions in record time. It is interesting to study the crowds of handshakers that call to pay their respects to the Chief Executive.

Fifteen minutes or a half hour before the allotted time, small groups of men and women will congregate in front of the executive offices, and shortly before the hour arrives, the White House policemen line up these small knots into coherent lines. At a signal they enter the door of the executive offices two abreast, each vouched for as they pass, congregating on the inside in bodies four and five abreast, moving onward toward the President's private office and reception room, where they are again divided and enter one by one, shaking hands with the President as

they pass through.
"My goodness!" exclaims someone, "I hardly saw him." But time is all-important, and it is impossible for the President to meet strangers and give them more than a handshake, however brief, or to discuss any question with them, or to hold animated and prolonged conversation, where hundreds or even a thousand may be waiting for the same privilege. Indeed, this handshaking privilege is accorded really to a very few of the hundred million who live in the United States and who annually visit the Nation's capital.

In fact, the President's time is so precious and there are so many pressing matters of importance coming up all the time that his engagements are practically limited not only to public questions, but to the most pressing vital public questions, upon which he is required to take action. Fortunately, very little of his time is taken up with diplomatists, who transact their business with the Secretary of State, but when necessary part of the afternoon is allotted for receiving them at the White House.

The President not only sees Senators and Congressmen every day, cabinet officers, heads of executive departments and of independent government establishments, but also many private individuals. Formal dinners occur once or twice a week. Every Tuesday and Friday at 10:30 a. m. there is a cabinet meeting, and after adjournment the President sees the cabinet officers, commencing with the Secretary of State, in their regular order of constitutional rank. Every Tuesday and Friday he sees newspaper correspondents, when national and international affairs are discussed.

The President does not see many people in the afternoon, unless he sends for them. This gives him an opportunity to look over the mail and answer his personal correspondence, which alone is a very heavy task, so that after luncheon the remainder of the day is generally spent with his secretarial staff answering his mail correspondence. An average of 2000 pieces of mail is received at the White House every day of the year, and of these the President's private and urgent mail runs as high as 300 pieces daily.

Sometimes the White House is flooded with form letters, such as a sackful of mail containing about 5000 individual letters urging the President to attend the joint annual convention of the United States Good Roads Association and the Bankhead National Highway Association at Savannah, Ga. This sackful of mail was the largest for volume on a single subject of any received at the White House in recent years. The President was, of course, unable to answer the letters personally and requested the Boy Scout Executive and the Superintendent of Schools of Savannah to express his thanks and appreciation for the invitations.

Just the same, it is surprising how many things must have his personal attention, not only of a private, but also of an official nature, and during sessions of Congress he is constantly receiving bills passed for his signature or his veto, all of which must be given thorough consideration. Moreover, all appointments and resignations require his attention. He also nominates appointees to the diplomatic and consular service and sends the lists to the Senate. All recommendations of the United States Tariff Commission pass through his hands and require earnest deliberation on his part.

A message has to be delivered at every session of Congress, which requires an enormous amount of time and energy in assembling data and discussing public questions with high officials and men in authority before hands with 1220 persons by actual count. This herculean handshaking task was accomplished in the short at a great many meetings of national societies and events. the speech is framed. He is also called upon to be present

Mirror of the World's Opinion

The opinions expressed in the quotations hereunder do not necessarily carry the indorsement of the Monitor.

David Starr Jordan Speaks

DAVID STARR JORDAN is the leading citizen of the Pacific Coast. He has been the leader of the movement for international peace in this country. We do not know whether he is a Republican or a Democrat, but we do know that he speaks with conviction and from information about government. He is for Hoover for President; and he knows why, and tells why in this letter:
"Never since Lincoln have we had an opportunity to

elect a man of such high ideals with the skill to make them good. Mr. Hoover, indeed, has never failed in any effort undertaken by him, provided success depended in any great degree on himself. To all tasks which engage his attention he brings a singleness of purpose and loftiness of ideal rarely equaled. The more intimate phases of his extremely lovable character are only slowly revealed, except to those who work under or with Thousands of these, the world over, are his declared worshipers. Austere he may at times appear, often merely to hide his extreme tenderness of heart, occasionally to reprove incompetence or selfishness.

'As one of the greatest engineers, he resigned a salary of \$100,000 a year, the maximum in his profession, and returned home in the hope of being able to serve his country in a public capacity. As President of the United States he will devote all his energies to advancing the material, moral and spiritual well-being of the whole people. To the consideration of our vital international relations he will contribute a degree of understanding and influence unknown to any other candidate ever presented for our highest office. With unusual modesty and self-restraint, he never boasts nor guarantees achievement beforehand; but the record of his past career gives abundant promise for the future. Not to enlist the abilities of this man, now, would seem to me a national tragedy, even a world calamity."

A remarkable tribute from a man who knows what Hoover has done and who knows well the versatile and able man he is .- Post-Standard (Syracuse, N. Y.).

Governor Smith's Appointments

BUSINESS men have been asking what course Alfred E. Smith would take in his appointments, as, for instance, to the Supreme Court bench, if he were elected President. It is a most important question, because it has always been the Democratic idea that their theories could be carried out if they could get a sympathetic majority on the Supreme Court bench, the number of justices not being limited by the Constitution of the United States.

There is no fair way of testing Governor Smith except by scrutiny of his appointments as Governor of New York State. Of thirty justices of the New York State Supreme Court, twenty-nine are Democrats and one is a Republican. This does not indicate the full court, but those justices who have been appointed by the governors in Smith's four terms and Nathan L. Miller's single term. The one Republican was appointed by Miller, and thirteen of the remainder are Democrats who replaced Republicans in vacancies caused by death or resignation.

Election of judges is provided in the New York Constitution, and, in several cases, Smith's appointments have been Democrats who ran for the office of Justice of the Supreme Court and were decisively turned down the voters. It would be difficult to find in the whole fortyeight states of the Union a more flagrant instance of the gerrymandering of the courts of justice. What would not

President Smith do to the United States Supreme Court if he could get his nominations through the Senate?

What is true of the New York Supreme Court in the matter of appointments by the Governor is true of the other courts. Out of fifty-two judicial appointments to the State Court of Claims, Court of General Sessions, County Courts, City Court of New York, special county judges. surrogates, etc., where the appointment was made by the Governor, there are just two Republicans, five in less important posts whose politics are not given, and all the

rest are Democrats. There may be instances, but so far

it is impossible to trace a case where the Governor has not

eplaced a Republican by a Democrat unless constitution

ally prevented. This is in a state, moreover, where the Bar Association has always maintained, in spite of its political complexion, that a judge who had completed his term should be renominated irrespective of politics. If that is not the Tammany machine working through the Governor of the State, what is?-Barron's Weekly.

The Secret of the Psalms

THE secret of the Psalms lies in the fact that they spring from the constant realization that everything in the universe and in the fortunes of men is dependent on God's will, and must finally fulfill His purpose. These ancient poets offer us a striking contrast to their modern successors. It would seem that nowadays men seek the inspiration of their verse by turning their thoughts upon themselves to be absorbed in reflecting on their own sensations, their own sorrows, their own perplexities, or their own triumphs. Their eyes are turned entirely to the little things of their human experience, and everything is judged in its relation to themselves. It is not so with the Psalmists. The central theme of life for them is God, and His praise is their joy. Their customary refrain is:

I will lift up mine eyes unto the hills, From whence cometh my help. My help cometh from the Lord, Which made heaven and earth.

-The (London) Times. Not With Liquor

DAVID B. ROBERTSON, high official of the Brotherhood of Locomotive Firemen and Enginemen, declares that any candidate who appeals to the working people of the country on a wet platform will receive a setback. "The support of the railroad brotherhoods cannot be

bought with liquor," he says. . . . Prof. Henry Farnam, in his letter to John J. Raskob, prominent member of the association and now Democratic national chairman, called attention to the fact that this same brotherhood years ago, for its own sake and for the safety of the traveling public, went on record against booze. That action was a comforting assurance to the public that whatever other hazards they ran on fast express trains, they would not risk anything from the

drink-muddled br. ins of train operatives. In conflict with this appropriate attitude, there are high officials of railroads now affiliated with movements aimed at prohibition. These same officials doubtless would dismiss promptly any of their employees found drinking, while at the same time striving to restore those conditions which at one time imperiled so gravely the safety of trains. To grade citizenship is not always easy, but contrasts like this seem to suggest some sort of a measuring stick .- The (Harrisburg, Pa.) Patriot.
